

ST. JOHNS REVIEW

VOLUME 14

ST. JOHNS, PORTLAND, OREGON, FRIDAY, JULY 12, 1918.

NUMBER 4

Chautauqua Program

Following is the program for the St. Johns Chautauqua, which opens in St. Johns next Tuesday evening:

Daily Schedule—Children's hour 9 a. m.; morning hour lecture 10:00; afternoon concert 2:30; afternoon lecture 3:00; evening concert 7:30; evening lecture 8:15. The morning lectures will be given by Superintendent Guy C. Emery, Julia M. Hunter is the Junior Supervisor. Tuesday evening—Opening Exercises and announcements; patriotic musical program, The Old Soldier Fiddlers.

Wednesday Afternoon—Prelude, Fenwick Newell Concert Co.; lecture, "Meaning of the Great War" by Dr. C. J. Bushnell. Evening—Prelude, Fenwick Newell Concert Co.; lecture, "Remaking the Kentucky Mountaineer," by James A. Burns. Thursday afternoon—Enter tainment, Morrison-Smith Co.; lecture, "When a Man Marries," by Marshall Louis Mertine. Evening—Prelude, Morrison-Smith Co.; lecture, "The Philosophy of Common Sense," by Dr. D. F. Fox.

Friday afternoon—Prelude, Zedeler Symphonic Quintet; illustrated lecture, Chas. Crawford Gort, The Bird Man. Evening—Concert, Zedeler Symphonic Quintet; lecture entertainment, "The Javille Court in Action," by Judge Roland W. Baggott.

Saturday afternoon—Popular concert, Thavio's Exposition Band. Evening, grand concert, Thavio's Exposition Band.

Sunday morning services in all churches. Afternoon—Sacred prelude, Treble Clef Club; Inspirational lecture, Ned Woodman; E. W. C. S. Vesper Services. Evening—Sacred prelude, Treble Clef Club; Government Accredited Lecture, "With Our Armies in Europe," Lincoln L. Wirt, D. D.

Monday afternoon—Prelude, Royal Hawaiian Quintet; Inspirational lecture, "Grapes of Gold," H. V. Adams. Evening—Mother Goose Festival, by the "Kiddies"; entertainment, "Hawaii—Land of Music; illustrated lecture, "Rambling Through Paradise," Mildred Leo Clemens.

Wedded in Seattle

Miss Hazel E. Fassett, youngest daughter of Mr. and Mrs. G. D. Fassett of 910 South Decatur Street, was married in Seattle at six o'clock Saturday evening, July sixth, to Mr. Lyle Sydney Wolfkill of Seattle, the Reverend Dr. Mayor, pastor of Capital Hill Presbyterian church officiating. The bride is a most charming and accomplished young lady and is well known in both athletic and social circles in Portland, being a member of the Multnomah Athletic Club and a Graduate of Jefferson High School. Mr. Wolfkill has been connected with the Navy Yard at Bremerton for some time and has charge of one of the departments there. He is a graduate of the University of Washington and they left Seattle at 10 o'clock Sunday morning for San Francisco, Oakland and southern points, and their friends learning of their lay-over in Portland of two hours, made the Union Station a joy scene with their placards, old shoes and rice and speeded the happy couple on their way. They contemplate being away several weeks, and for the present time will make their home in Charleston, near Mr. Wolfkill's business.

Last week Mr. and Mrs. K. C. Couch received a pleasant visit from A. N. Wennerlund and wife of Tacoma. Mr. Wennerlund had recently come from England, and on Decoration Day met Kindie C. Satterlee and other Portland boys at the American burying ground at Liverpool. He stated that Kindie was looking fine and getting along in good style. Mr. Wennerlund was a sailor on the Chatahochee, which was torpedoed on the way over, the crew escaping on the boats. On the return trip he said that while he was standing upon the deck a big submarine suddenly rose out of the water not more than sixty feet away, but it lost no time in disappearing. Several depth bombs were thrown after it, and it was the belief of the captain that the submarine was destroyed.

Kodak is the trade mark of the Eastman Kodak Co., and cannot be rightfully applied except to goods of their manufacture. We sell KODAKS. Currin Says So.

Building New Houses

Setting aside talk and getting into action, the Grant Smith-Porter Ship company, under a plan fostered by Eric V. Hauser, has undertaken a practical and, it is hoped, acceptable solution of the housing problems that particularly affect the employees of the St. Johns concern, says Sunday's Journal. The immediate result of the plan will be the construction and sale at actual cost of eight cottages for workmen and the plan, once successfully executed, is expected to serve as a guide for a more public and general interest in housing questions.

Eight lots, each 50 by 100 feet and slightly, have been purchased by the company at a figure said to be the normal level of realty values in the district. Upon these lots eight cottages of four and five rooms are under construction, some of them nearing completion. The property upon which the building is being done is bounded by Fessenden, New York and Edison streets and Willamette boulevard.

Completed, the houses including the lots upon which they are located, will present values of \$2200 for the four rooms and \$2550 for the five rooms. At these figures, supposed to include the 6 per cent interest which the company will collect upon its building loans, the structures will be sold to employees of the company on easy payment installments, similar to prevailing rents in the district.

Prospective purchasers are keenly awaiting the arrival home of Mr. Hauser, who will determine details of disposing of the properties. Not only have applications to purchase more than the eight houses been made but the eight have been spoken for many times over. Which indicates the reception the Grant Smith-Porter plan has from the company's employees.

A novel and valuable feature of the scheme of housing employees permanently is the fact that the company will save the interiors of its structures unfinished at the request of the purchaser, saving him the added cost and permitting him to do his own interior work if he chooses. Inasmuch as the men who will buy the places work only eight hours they would have considerable time to spend in finishing the places to their own liking.

It is said that this feature of the plan is approved by the men who have applied to purchase their homes. By doing their own interior finishing the men see an opportunity to save considerably on the purchase price and a number of them will undoubtedly include clauses covering this in their bills of sales. The Grant Smith-Porter houses are to be of modern frame construction, with full cement basement. They will be built and equipped in the most up-to-date style. Sewerage and city water are already on the block and modern electrical service will be installed.

To load lumber, the famous concrete steamer Faith, first large vessel ever built successfully of concrete, put into the Portland harbor last week, direct from Puget Sound, and will take on added cargo at St. Johns. Her maiden cargo will comprise entirely Northwest lumber, approximately half of which will be loaded at St. Johns, it is said. The Faith, 5500 tons, will carry 2,000,000 feet of lumber, and the voyage starting at Portland will be her first other than her maiden trip from California to Puget Sound, where she delivered a light cargo, and, incidentally, her owners say, proved her worth. On the northern trip she battled heavy gales, plowing through the water in a fashion that brought great praise from all who appreciate the performance of deep-water craft.

Using his child for cougar bait was the pleasant pastime of a rancher at Red Gap, Vancouver Island, recently, according to Frank R. Pendleton, director of spruce production in British Columbia. Pendleton says the rancher was unable to get a shot at the cougar, which had killed his dog. So he staked his 3-year-old child out near the edge of the woods and with a gun laid in wait for the animal to appear. But the bait did not lure the cougar. Mothers on the island protested but the rancher was sure he could hit the animal before it reached his son.

Thelma is the queen of perfumes. Get it at Currins.

Save Waste for Red Cross

Save your waste and help win the war. Take it to the local fire station, where it will be collected July 24th. Linnton and Peninsula people having waste and cannot convey it to the fire station are requested to call Miss A. Darowish, district manager—Columbia 353, before July 24th. Waste especially desired: Tin or lead foil, folded flat; do not roll.

All metals, copper, brass iron, zinc, aluminum, wire, screens, cast iron junk. Rubber junk of all kinds, old motor tires and tubes bicycles tires.

Old magazines, newspapers folded and tied, paper bags. Burlap and gunny sacks, string rolled into balls, Cotton and hemp, separated.

Clean white rags, woolen rags, separated, mixed rags, empty spoons.

Old clothes, old shoes, old kid gloves, leather cushion tops. Fruit jars, cold cream jars, bottles of all kinds, cleaned, flower pots, old camera plates, collapsible paste and paint tubes, wafer tins, corks, tin pails, cans with covers.

Typewriter ribbon boxes and spools, carbon-paper boxes, egg cartons, berry boxes, crates. Wooden and pasteboard boxes of all kinds.

Why the Mosquitos

Every year, about this time the high waters of the river begin to recede and the woods are filled with pestiferous mosquitoes which have bred in the stagnant pools along the main waterways. Conditions seem to have been unusually favorable this year to their development, although the reason is not clear, for the floods did not reach an excessive stage. Like the visitation of aphids which occurred earlier in the season, the mosquito plague must be accepted as an uncomfortable fact.

Those who like to reflect upon the mysterious ways of nature, and particularly those who hold that everything has a good purpose if only we could understand it, will find a broad field for their fancy. The mosquito has been studied perhaps as much as any other insect, because of the part he plays in the dissemination of disease, but no scientist has yet been able to discover a reason for his existence. The carrion crow justifies his being by acting as scavenger, and the coyote has accomplished something toward preventing overpopulation of the earth by rabbits, but the mosquito does nothing to earn his living. The "balance of nature," which naturalists always are anxious to preserve, would not be disturbed if mosquitoes were exterminated.

The process of extermination is now going on. In the more thickly populated districts measurable progress has been made toward the draining of stagnant ponds and free use of crude petroleum has shortened the mosquito season to a minimum. In this part of the country we are fortunate in having a season which is naturally short. About three weeks of them is the rule, and then there is absolutely nothing to detract from the charm of the Oregon outdoors.—Oregonian.

The meeting of the W. C. T. U. will be held next week on Tuesday instead of Monday, and will be held in the Y. W. C. A. rooms. The paper for the day, "The Relation of Human Conservation to Food Conservation" will be given by Mrs. M. C. Tufts. We all know this is a very important subject at this time. Aside from this paper there will be a fine musical program. The program in part will consist of piano duet by Misses Pauline Young and Louise Lott; vocal solo, Miss Hazel Lyle of Portland; saxophone duet, Dr. and Mrs. J. V. Scott; vocal solo, Mrs. E. N. Hudson. A number by the Juvenile Orchestra conducted by Mrs. F. A. Rice. Light refreshments will be served. Remember the date, Tuesday, July 16, 2 p. m.—Reporter.

Ice Cream Social AND Lawn Fete AT CLEMENT'S SCHOOL Sunday July 21st At 3 o'clock, P. M.

Southern Educator at Chautauqua

"Burns of the Mountains" Has Educated the Feud Spirit Out of His People

JAMES A. BURNS.

One of the biggest achievements in the Chautauqua world in recent years was the securing of President James A. Burns of Ononda Institute, Kentucky, for the platform, with his absorbing story of life in the "feud" country of Kentucky. Known affectionately by the rugged title of "Burns of the Mountains," this man has made himself one of the distinguished men of his state and has challenged the attention of the nation by his unselfish labors for his fellow men.

Without money and without influence he built a university in the Cumberland Mountains of Kentucky. Today he is educating six hundred boys and girls at this school forty miles from the railroad, boys and girls who otherwise would probably have never received any education. The story of this great work was recently told in the American Magazine.

President Burns comes to Chautauqua on the second night. Out of his personal experiences he reinterprets the upward tiding of humanity and thrills his hearers with the very simplicity and elemental strength of his speech.

Elevator Progress

Forms in which the foundation for the municipal grain elevator at the St. Johns terminal were started last week, also the work of placing reinforcing steel, and the Grant Smith Co., who have the contract for the 1,000,000 bushel plant, has begun pouring concrete. All foundation piling has been driven and, as soon as the concrete rises above the water-proofing line, three shifts of men will be engaged to speed the undertaking. The commission of public docks has made all possible preliminary arrangements. All of the reinforcing steel, which was obtained early through priority orders of the government, was cut and bent at the expense and under the direction of the commission, and has been delivered on the site. Machinery and equipment of various kinds purchasable only in the east have been ordered, and through steps taken it is assured its movement will be expedited as soon as ready for shipment.

At a meeting of the directors of the Peninsula National Bank last Saturday afternoon Grant Smith was elected president to succeed the late Peter Autzen. The new president is widely known throughout the North-west for his great activity in railroad construction and other big projects. He is at the head of the big Grant Smith-Porter Ship Company of St. Johns, and for some years has been a director of the Peninsula National Bank. His selection as president of this flourishing and rapidly growing institution meets the approbation of the patrons of the bank as well as the people in general.

The Columbia River base ball team went down to a grand defeat at the hands of the Grant Smith Porter club July 7th. Henning, who pitched for the locals, was at his best, allowing only three hits, while the locals made 11. The score was 13 to 1, in favor of Grant Smith Porter. The hitting of J. Sheg and Yaker featured the contest. The next game will take place on the 14th, when the strong Foundation team will measure bats with the locals. This game will no doubt be exciting from start to finish.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that a man can be cured in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CLEGG & CO., Toledo, O. Take Hall's Family Pills for constipation.
