Eighty carloads of freight are held up awaiting shipment at the St. Johns municipal terminal because of the strike in the shipyards. All of it is consigned to Oriental ports and should have been shipped aboard the Waban last week. The Waban is a 9500-ton steel steamer constructed by the Standifer company, which had been allocated by the shipping board to the Pacific Steamship company. The vessel lacked only two or three days' work to complete her when the strike held up all work at the Standifer yards. Freight is now being assembled at the terminal for the Montague, which is the next vessel scheduled for the Oriental run by the Pacific Steamship company and due to sail the last of this month. Doubtless the Montague also will be held up as it also is a Standifer ship.—Telegram.

THE other day we received a letter from a working man in St. Johns which gave us a great deal of pleasure because it proved that the spirit we try to put into our service is appreciated. The letter said in part:

"I have had dealings with banks in Ireland, New York, California and Oregon and in none of them have I seen the spirit of civility and courtesy to the working man that is so much in evidence in your bank. This seems to me a true spirit of democracy. May it continue and expand with the growth of your business."
