For County Assessor

MAJOR HIRAM U. WELCH
No. 149

On the Republican Ballot
Major Welch has served as a valuing officer of Multnomah Co. in Administrations of four Assessors, and is at present Chief Field Deputy in the office. He has the indorsement of Assessor Reed, who says of him:
"Major Welch is an experienced and competent valuing officer, is a man of splendid executive ability and judgment, is familiar with the fundamentals of taxation and the laws pertaining to it, and is fully qualified to fill the important office of County Assessor. His service in the Army in the Spanish War, in the Mexican border troubles, and in the world war entitles him to the special consideration of the voters."
Major Welch's Slogan: "Long experience in the Assessor's office a sure guarantee of efficient service."
Paid adv.

HOW "ROMOLA" WAS WRITTEN

George Eliot's Immortal the Result of an Inspiration and Much Hard Work.

The scene of "Romola" is the Florence of the fifteenth century, and the plan of it came to George Eliot in the course of an Italian journey, "one of those journeys that seem to divide one's life in half so many new ideas do they suggest, so many new sources of interest do they open to the mind." Having fixed on her scheme, she returned to Florence, visiting the old streets, rummaging ancient books, seeking to impregnate herself with the spirit of the venerable city. But she was still far from her goal. When, on her return home, she at last set to work, she saw its difficulties rising before her. Would not her genius desert her when she left the familiar scenes of rustic life in the England of today for foreign countries and past ages? She despaired more than once, gave up her task, then took it up again, plunged conscientiously as she did everything into historical studies, and brought forth in sorrow a kind of moral tragedy which even the reader cannot behold without emotion.—Edmond Scherer.

SCULPTOR'S USE OF CEMENT
Gigantic Figure of Neptune is Work of Art as Well as Architectural Curiosity.

At Monterosso, near Spezia, Italy, there stands an architectural curiosity—a gigantic figure of Neptune, constructed of cement and used to support the extreme end of a terrace for a seaside villa. The house is the Villa Pasquetti, and the statue is the work of Arrigo Minerbi, a talented sculptor of Rome.
A small promontory on which the villa is built presented many difficulties to the architect, but he finally succeeded in building there a very commodious and comfortable residence. The statue, which is wonderfully life-like, is about 33 feet in height. The body, which, like the head, is built of reinforced cement, is hollow, and contains a spiral staircase. Considering the nature of the material with which Signor Minerbi had to work, he is to be congratulated on the result of his labors.

"All For a Song."
"He has sold his future for a song," they said of a rich man's son who, instead of taking advantage of the unusual opportunities open to him for a worthwhile career, was willing away his golden years on the Great White Way.
"All for a song" has come to mean to us "paying too much for a whistle," any undue sacrifice or waste for something that is worthless or only of transient moment, particularly the superficial.

It has come down to us from the day when its significance was literal. As a token of her appreciation of the poet, Edmund Spenser, Queen Elizabeth ordered Lord Burleigh to present him with £100, which in those days was a small fortune. Upon this Lord Burleigh is said to have exclaimed "All this for a song!"

Penn and Land Buying.
The story that William Penn bought from the Delaware Indians as much land as a dozen bulls' hides would cover and then cut them into narrow strips to cunningly enable him to trick the Indians by encircling a vast stretch of territory is not true. This is a very old story. It was told in remote times of Dido of Carthage. The legend is that Dido built that city after buying as much land as a bullock's hide would cover. She cut the hide into strips, getting a large bit of real estate in the transaction. The story reappears in the case of the Dutchman in Irving's "Knickerbocker," who bought as much land from the Indians as Tenbreek's trousers would cover. But Tenbreek had no pair of trousers enough to cover the island of Manhattan.

Pertinent Questions.
Among the many Irish anecdotes told by Canon Haunty, author of several books under the pen-name of "George Birmingham," is the following. An Irish gentleman who heard of the death of a great enemy of his, who had harassed him for many years, remarked: "Well, it's a comfort to think that the devil's got that fellow at last." A clergyman who happened to be present felt it his duty to reprove against this uncharitable view of the dead man's condition. He said he hoped that, in spite of all that had passed, the poor man might have escaped the extreme penalty. "Well," retorted the other, "if the devil hasn't got that fellow, all I can say is that I don't see much use in keeping a devil at all."

Rats as Food.
Doctor Kane, the Arctic explorer, said that one of the worst curses in the far North were the rats that infested his ship. Nevertheless, when in want of other food, he was glad to eat them—sometimes chopped up and frozen into tallow balls.
He wrote: "During the long winter nights Hans beguiled his hours of watch by shooting rats with bow and arrow. The repugnance of my companions to share with me this table luxury gave me frequent advantage of fresh meat soup, which contributed no doubt to my comparative immunity to scurvy."

SEA WORM SAMOAN DELICACY

Its Infrequent Arrival Always Made the Occasion for the Holding of a Great Festival.

Palolo, the most prized of all gustatory delicacies in Samoa, declared by Americans who have tried it to be superior to the lobster, is a marine worm, being rather mysterious in that it is never seen save on two or three nights in the entire year. Its appearance seems to be regulated by the moon.
The palolo chooses the time for its first appearance on the night when the October moon changes. When the moon rises the sea is seen to be alive with wriggling green and brown worms, some of them a yard or more in length. The natives make a festival of the occasion, going out with dip nets among the reefs and scooping up the worms by the bushel. They paddle around in every available boat with lighted torches waiting for the moon, and then the scene becomes one of great and joyous excitement.
The palolo comes once again when the November moon quarters, and is not seen again until the following year. It is said to live in crannies of the coral reefs, coming to the surface to spawn at these lunar periods. Some of the worms are eaten as they wriggle, but the bulk of the catch is reserved for a big feast on the following day, when they are wrapped in banana leaves and baked.

YEAR ONCE BEGAN IN MARCH

Change in Style May Be Said to Date From 1752—Great Militant Events in Month.

Few people know, or, if they do, have forgotten, that March, and not January, at one time was the first month of the year, remarks the Chicago Journal. For commencing the year with March there seems to be sufficient reason in the fact that it is the first season after the "dead year," in which decided symptoms of growth take place.
The name is derived from the Romans, among whom it was at an early period the first month of the year, and continued to be in several countries to a comparatively late period, the legal year beginning, even in England, on March 25, until the change of style in 1752. For the Romans to dedicate their first month to Mars and call it Martius seems equally natural, considering the importance they attached to war and the use they made of it.
In the history of our own country April appears to carry off the palm for the month in which great militant events occurred, yet in the world war a number of epoch-making incidents took place in March; for instance, the revolution in Russia in 1917, when Czar Nicholas abdicated on March 15. The big drive on the 50-mile front from Arras to La Fere began on the 21st, and Paris was in that month bombarded by "Big Bertha."

Strong Caps of Paper.
Astonishing strong paper caps, capable of withstanding powerful blows, though extremely light in weight, have been invented by a shipyard employee, and are intended to be worn by workmen whose duties expose them to danger from falling objects, says Popular Mechanics Magazine.
The process by which the novel headgear is produced has not been divulged, but it is known that chemicals are employed to harden the material, without adding to its weight. Several styles have been made, the lightest weighing about seven ounces, and others slightly more. In a recent test, a 1-pound bolt was dropped on one of them from a height of forty feet, with the result that a barely perceptible dent was made in the paper. The novel head coverings are proof against water and acids, and are nonconduits of electricity.

Heat for Alaska.
The Pacific has its own "Gulf stream," which is called the Japan current, and it is formed in the same way.
The trade winds, blowing from the tropics, hunk up the warmed ocean waters in the Yellow sea (corresponding to our Gulf of Mexico), and thence they pour out between Japan and Formosa, the stream thus formed passing south of the Aleutian chain, along the southern coast of Alaska, and down the west coast of North America.

Hence it comes about that the whole southern coast of Alaska has a temperate climate. It is warmed by the Japan current.
What Really Keeps Time.
As a measure of time the pendulum ranks today as the most perfect of our instruments says the Scientific American. It is the part of a clock that keeps time. All the rest of the mechanism is simply for the purpose of keeping up its vibration or to point on a dial the number of vibrations it has made. It swings back and forth in a complete arc 30 times each minute, but allows the escape-wheel to make a cog at each vibration, thus checking off on the dial, by means of the second hand, 30 seconds of time. In a similar way, minutes and hours are recorded, and by a like process a watch is guided.

Tranquillity Overdone.
"So you slept for twenty years!" "Yes," replied Rip Van Winkle; "and I'm compelled to admit that when a man tries to conquer 'unrest' there is danger of his going too far."

WILLAMETTE UNIVERSITY HAS GREAT OPPORTUNITY

Campaign of Oregon Laymen to Raise \$100,000 May Lead to a Very Large Endowment.

According to A. F. Fiegel, chairman of the campaign executive committee of the Laymen's Association of Oregon, working in the interests of Willamette University, there is excellent reason to believe that, if friends of the old school in the Northwest subscribe \$100,000 for its immediate needs, others who are watching the progress of the institution and are but waiting to see what is done now, will come forward and make large contributions that will go to make the university a very much larger one before two or three years have gone by.
The \$100,000 which the laymen of the Oregon conference are now seeking is for the immediate restoration of Waller hall, for now; completion of Lausanne hall, the women's dormitory, and a heating plant.
With these improvements, which are absolutely essential to the largest usefulness of the university in caring for pupils already enrolled and the usual annual increase, Willamette will be very well provided for on the present basis. Should there follow large gifts, as predicted by Mr. Fiegel, of course a number of other buildings would be constructed and the entire activity of the school would be greatly enlarged.

The active canvassing for funds probably will be undertaken about next week. From all over the state have come to the members of the committee assurances of support. Many have said they know of no other means of investing money that will bring larger returns.
Headquarters are at 505 Platt building, Portland.

Willamette University Endowment Campaign

The campaign to raise \$100,000 for Willamette University at Salem is well under way. All of the preliminary organization work has been completed and about next week the actual canvass for funds will be undertaken. This undertaking is backed by the Laymen's Association of the Oregon Conference of the Methodist Episcopal church and funds will, naturally, come chiefly from members of that denomination. However, as others have in the past given generously to the fine old institution which for 75 years has been steadily turning out men and women whose lives have gone far toward making the great Northwest what it is, so no doubt will be the case in this effort adequately to finance Willamette.
While having the heartiest, enthusiastic indorsement of the late Bishop Hughes, who set aside precedent and asked the pastors of the conference to have a special Sunday for Willamette, and the full support of the ministers, the campaign is really a laymen's project. At their conference, held in Salem last October, the delegates unanimously decided to take hold of the situation this year and put over a big job for the school. Therefore, they are directing the work through a special executive committee, backed by a larger advisory board of prominent lay members of the church. Headquarters are at 505 Platt building, Portland.
Funds subscribed will go to enable the trustees to rebuild Waller hall for men and Lausanne hall for a women's dormitory, with installation of a central heating plant, thus clearing up the present crowded condition at the university.

Why Willamette University Needs Help
Willamette University, located at Salem, is one of the oldest denominational schools in the country, has a magnificent record of achievement and has given to the world many men and women of strong character who have contributed and are contributing to the best progress of the nation's life—especially of the Northwest.
Willamette exists for but one purpose—to educate men and women fully, in a Christian way, and to send them out into the world to help make it better. That is what it has been doing for 75 years and what it will continue to do on a larger scale.
Willamette now needs the rehabilitation of Waller hall, partially destroyed by fire last December, and completion of Lausanne hall, the former for men and the latter as a dormitory for women. A central heating plant is also required.
Laymen of the Oregon conference have set out to raise \$100,000 for this purpose. Confident that the old school is entitled to even more than this amount, they will canvass the state about next week. To what better investment could money be put?
Campaign headquarters are in room 505, Platt building, Portland.

Timid Old Soul.
My aunt was a timid old soul and was quite afraid of holdups. For safe keeping she always put her money in her stocking. One day when she was going to do some Christmas shopping she thought she would play a joke on the holdups. She put the money in her pocket and carried her purse. In the purse she put newspaper crumpled up. She kept her hand in the pocket that had the purse and walked along merrily. But to her surprise when she had purchased her needs she reached for the money, but it was missing. Then, forgetting she reached for her pocketbook and pulled out the paper she had to give back all the articles and walk home empty-handed.—Chicago Tribune.

Help Given by O. A. C. to the Oregon Farmer

in grain-raising, dairying, horticulture, stockraising, poultry production, and other branches of agriculture, have

Saved Oregon more than Higher Education has ever cost

from its very beginning in Oregon. The College has reduced cost of production, improved quality of product, and helped keep down the pests of farm, garden, orchard and field.

Like the State University and the Normal

it has helped bring school, business, and home into vital contact, and has helped demonstrate that

Higher Education is of direct help to the Country Districts

But higher education in Oregon is crippled by great increases in attendance, by lack of buildings, by the fallen buying power of the present millage support, and by the failure of the millage support to grow.
You are respectfully urged to vote for the new millage support bill on May 21, the Higher Educational relief measure.

Why the Electric Cleaner
There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping.
True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up 90% of the dirt; and if you like the exercise and have plenty of time and strength a broom and carpet beater will do the work after a fashion.
In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."
But people use soap because it cleans more easily and better than water alone.
For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.
