

Why the Electric Cleaner

There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping.

True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and carpet beater will do the work after a fashion.

In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease."

But people use soap because it cleans more easily and better than water alone.

For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.

The cutting of the finger-nails is one of those little tasks from which we are relieved only by the grave. It is computed that their average growth, in sickness and in health, is 1-32nd of an inch a week, a little more than an inch and a half a year. This rate of growth, however, is not the same for all the fingers, the thumb and the little finger being the ones whose nails grow more slowly than the others, while the middle finger is the fastest of the lot. In summer it has been observed that they grow quicker than in winter, and some authorities hold that the nails on the right hand lengthen more rapidly than those on the left. In either case they grow four times as fast as the nails on our toes.
