JUDGE ALDEN COMES WITH GREAT LECTURE

Massachusetts Jurist is of Mayflower Descent.

Judge George D. Alden of Massachusetts, a direct descendant of John Alden and Priscilla, is one of the lecturers of national prominence coming to Chautauqua this year. Formerly a prominent member of the bench in

Massachusetts, he is now one of America's leading lecturers. He has come to be regarded as one of the great powers for good in this country in the molding of public opinion and in the shaping of character.

With a fund of rare wit, absolute originality and a driving forcefulness that carries conviction, his lecture is a masterpiece of the platform.

A good deacon, after coming from a meeting rather late one night, found his wife had retired. Feeling hungry, he looked around the pantry for something to eat. He found a box of sardines, but could not find the can opener. So he tried to open it with the screw driver, but that would not work, and the good man began to say things. His wife, hearing him, called: "John, what are you doing?" "Opening a box of sardines," replied the deacon. "What are you opening it with?" inquired the wife. "The screw-driver," replied the deacon. "O," said the good wife, "I thought you were opening it with prayer!"—Ex.

Expansion of Oregon's markets to the four corners of the earth has greatly increased the demand for tin cans here. As a consequence, the American Can Company has applied for a permit to construct a three-story concrete plant on a tract recently purchased in North Portland, which will be devoted entirely to the manufacture of cans. With its equipment, the new structure will cost well over \$1,000,000.

Why the Electric Cleaner

There is really no comparison between the ease and thoroughness with which an Electric Cleaner removed dirt and the difficulty of sweeping. True, one CAN clean rugs and carpets without an electric cleaner. A broom or carpet sweeper will brush up SOME of the dirt; and if you like the exercise and have plenty of time and strength a broom and carpet beater will do the work after a fashion. In the same way one can wash without soap. Water alone will remove some dirt if applied with enough "elbow grease." But people use soap because it cleans more easily and better than water alone. For the same reason people use Electric Cleaners because they clean more easily and far better than other methods.
