Advertising in the Review undoubtedly brings results. One party who had a house for sale ad in the paper for a few weeks says he received about 25 calls, another says he received ten calls on the advertisement of his property in one issue. Others tell of good results. The people read the paper. There is a big demand for property, and the way to bring it to the attention of the would-be buyer is to advertise the fact. Do not expect the buyer to hunt you. Tell him about it in the Review. It most surely pays.

The deceased was the daughter of Mr. and Mrs. C. V. Zimmerman, and was born in Kentucky March 18, 1894. The funeral services took place at the chapel of the St. Johns Undertaking Co. Wednesday morning at 10 o'clock, interment taking place at Columbia cemetery.

The promoters expect to sell \$100,000 worth to the public. The plow is the invention of William Watson of Portland. It is claimed that the device will plow the ground to any depth desired and pulverize the soil and seed it at the same time, with the contrivance an acre of ground can be plowed, pulverized and seeded in an hour, claim its backers.—Portland News.

## Why is a Bank?

There are some folks who think that a bank is not a necessity in the social order:

And there are many who know a bank only as a place for keeping money safe.

When they think of a bank they picture in their minds a massive structure with a lot of locks and bars and vaults and safes, and they think of their own money as being "stored" where it will be absolutely safe and draw interest.

But these folks mistake the real function of banking.

To be sure a bank's first duty is to insure the absolute safety of the money entrusted to its care, but the REAL OBJECT of banking is TO KEEP MONEY WORKING—for everybody.
