

ELECTRICAL Housekeeping

Eight hours is insufficient time for human hands to perform all the household tasks. However, it is possible to establish the eight hour day in the home by making use of the electrical hands that are offered to you in the form of the electrical dish-washer, washing machine, ironing machine, vacuum sweeper and many other labor saving devices.

These uniring "household assistants" will do your work quickly and efficiently. Your home can be run systematically with these electrical hands for they never disappoint you or grow tired. Your time and energy can be devoted to the better things of life, when you keep house electrically.

Glad to show you any time—

SAVE 50c to \$10.00

On Your Next Frock by Using the Deltor

It shows you how to save from one quarter of a yard to one and three-eighths yards of material.

The saving amounts to \$2, \$4 and as high as \$10 with expensive materials. Even with average-priced materials, it saves more than the cost of the pattern with the Deltor.

Perhaps it's a suit you want or one of those smart sport coats or a trim little dress to wear with your Spring furs or one of those intricate colorful negligees or an evening dress from Paris?

Whatever you want, if it is clothes, you can have it successfully for a negligible cost by following the wonderful patented invention for making your clothes at home.

The DELTOR

is a series of sketches, a picture-lesson enclosed with your new Butterick Pattern, for sale in this store, showing your suit, your dress, from the time you cut it out until it is completely finished. There is just enough printed instruction to make the pictures talk.

Cutting

Cutting charts aren't new? This one is! It doesn't show size 36 only when you have bought 42. It doesn't show it for 40-inch goods when yours is 54. It shows the pattern-drafter's own "trick-lay" for every size and every width of goods. And in so doing, it often saves you dollars in material.

Putting Together

And then—you won't have to debate any more as to what to do first. And whether that's the back or the front of the sleeve. And how the belt goes on. And why, oh! why, you can't seem to make the cuff behave. It's all in your Deltor. In pictures. With nice little brief instructions.

Finishing

And there's a page of inestimable value—a page of finishing instructions, those little-big things that make all the difference between a French model and a Sixth Avenue imitation. Not general finishing instructions, but specific instructions for making that one dress, of your material, in your size.

Best of all, when you've made a dress by the new way—the Deltor way—you not only have the dress itself, and all the money you would have spent if you had to buy it ready-made, or go to an expensive dress-maker for it, you have the real beginnings of a dressmaking education.

Paint Creates Prosperity

Save The Surface and You Save All

The "run down" house (there is one near you) is fast going to ruin merely because the owner unwisely neglects to keep it protected with paint.

It costs more not to paint than to paint. Paint saves the surface and protects the building from sun, rain, frost and varying weather conditions that bring destruction.

Prosperity demands the protection of all exposed surfaces with good paint.

ACME QUALITY HOUSE PAINT

Gives lasting protection and beauty.
It costs less because it takes less and lasts longer.
Call at our store and let us show you color samples and assist you in selecting the proper color combinations that will make your house appear to the best advantage.
