

What Water Does for Batteries

Not too much or too little—but just the right quantity of water ought to be kept in your battery all the time.

The water does two things: it keeps the battery solution over the tops of the plates so that the whole plate surface is used; and it gives proper strength of solution.

Don't hesitate to ask us for water service even if yours isn't a Willard Battery. The Willard Standards of Service are the same for every make.
