**Battery Weather**

Summer's good for batteries just as it is for people—providing they don't get all "het up". But regardless of warm, easily started motors, heat-thinned oil and so on, you have to look after your battery to keep it fit. Just drive around and tell us to do whatever's necessary. That's what we're here for. Same service—same Willard Standards no matter what the make of your battery.
