SOLD BY

Bonham & Currier

GLORIA COFFEE

Food Prices are going up in a rapid manner but it is no time to begin to buy in a foolish way as that will only encourage a further rise in everything. Sugar, Flour and Canned Fruits and Vegetables will go higher and it might be well to buy moderately on these.

Potatoes and most Vegetables are very cheap still. Fresh Eggs and Butter will soon start downwards.

Cheese has not changed in price and we still have mild fresh Cream Cheese in the Brookfield. We also have the Tillamook Cheese in the Langhorns.

Remember that we carry Wheat, Scratch Food, Cracked Corn and Egg Mash for the Chickens.

All the new pack of Dried Fruit is in now. Several varieties of Raisins, Currants, White and Black Figs, Apricots, Peaches and Pears. The new Cluster Raisins are better than ever this year.

A meeting of the Community Club will be held Tuesday night at Y. W. C. A. for election of officers. Short program and refreshments.

Dr. J. Vinton Scott arrived the latter part of last week from Shanghai, China, on a business trip which will keep him here about six weeks. Dr. Scott is well known in St. Johns where he spent most of his life prior to going to China with his wife and daughter four years ago. Following his graduation from North Pacific dental college he practiced dentistry here for several years.

While Dr. Scott is glad of the opportunity to visit the United States and feels particularly at home in St. Johns, although he can see many changes in the last four years, he says that neither he nor his wife has a desire to return to the U. S. to live, at least not yet. There is a fascination about the life in Shanghai, where you meet so many interesting people and where the common drudgery is done by servants obtained at small cost. Even in his work as a dentist, Dr. Scott says he is able to hire coolie boys who assist with the laboratory work making it much easier for him.

There are, of course, some disadvantages among which, he says, is the necessity of having to cook all fruits and vegetables before they can be eaten on account of the system of fertilization used by the Chinese. The summers are intensely hot and mosquitoes are quite plentiful—not the large variety, however, but the small ones from which even mosquito netting does not always protect you.

In the foreign settlement, he says, there is every known convenience. They have motor cars of American make, he, himself, having a Dodge in which they take some beautiful drives. There are also private schools for the foreign children while the Chinese children have but little advantage in educational facilities.

Children seven years of age consider it a privilege to work in the silk mills for twelve hours a day, receiving only a few pennies as wages. The foundries also employ many children of this age, who swing heavy hammers for twelve hours.

The native school houses are easily discerned by the noise which comes from the children studying aloud—the louder he studies, the more the education.

Dr. and Mrs. Scott are the parents of twin boys who arrived at their home in Shanghai about five months ago. The boys are William Howard and J. Vinton.
