In all the great, throbbing, pulsing, grow-ing, booming west there is one slow thing-lightning. My experience with the telegraph lines was slow, and, to me, very expensive. About 4 o'clock one day, at Topeka, I con-fided to the Santa Fe, Colorow and Solar System Telegraph company a telegram to Chicago, one to Parsons, Kan, and one to the Coates house, sixty-six miles away, tell-ing the landlord to have my rooms ready at 6:5. The telegram reached the Coates after I had eaten and digested my supper and had gone to bed. The other one reached Chicago some time that same uight, and I don't know what became of the one to Parsons. And soveral other times I tried the telegraph, but only to be convinced that I could have the message delivered a few hours earlier by sticking a special delivery stamp on it and taking it along with me.
