OREGON'S BRILLIANT DISPLAY.

The Brutality of the Foreman of California Mine-Davis Will Case Again in Court.

Five large ships will load grain at San

The total valuation of the estate of W. S. Ladd, who died at Portland some time ago, is 17,500,858.

The Atlantic and Pacific railway is suing the Prescott and Arizona Central for (25,000 for use of material. Portions of Southeastern Oregon are said to have been devastated by grass-

hoppers and crickets this summer. Stockton is willing to contril u e \$100,-000 and the right of way into the city if it can be assured of a competing railroad in the San Joaquin Valley. Judge Ross at Los Angeles has over-

A bar of gold valued at 10,000 was brought to Virginia City from Silver City. The bar is the result of the crushing of eight tons of ore from the Oest ing of eight tons of ore from the Oest care attention. Artists think the interest attempts to eject them.

A radical reorganization of the coast

John McLaughlin, foreman of the Providence mine at Nevada City, Cal., beat Charles Runge over the head with a two-pound weight, and fractured his skull. This enraged the miners, and after McLaughtin was released by the court on a bail of \$5,000 he had to be escorted by officials to his hotel, a crowd men, it is believed McLaughlin would have been strung up.

galmon on the Fraser river this year, and 1,325 boats are at work. Sockeye in immense numbers, the average take by steady fishermen being 1,000 for twelve hours. The run has never been better than at present, and the canner-les cannot get away with the quantity of the supposed loss from an old and wealthy friend.

The circulation statement issued by ruse of the woman to secure a present to the Treasury Department shows that the make up for the supposed loss from an old and wealthy friend.

Ex-Premier Mercier, accompanied by ruse of the woman to secure a present to the Treasury Department shows that the make up for the supposed loss from an old and wealthy friend.

The fight of the miners in Southeast. fish supplied them, though some of them are packing 1,500 cases daily. Recently fish were so plentiful that 5 cents each was the price asked by many fishermen; but, owing to the great supply, numbers were unable to sell. If the run continnes ten days longer, as it doubtless will, the pack will aggregate fully 450,000 preparations to pack to their full capacity, and will fill every can.

The following item is from a recent issue of the World's Columbian Illus-trated, the official organ of the exposi-"Oregon has adopted a unique and practical method of displaying the woods produced in that State. At Jackson Park there is a house constructed entirely of Oregon woods. It is ten feet surmounted by an open cupola. The body of the structure is a yellow pine. The roof is of red-cedar shingles, and is supported by four Doric columns, The columns are of maple, and are very rich-ly carved. The roof of the cupola is supported by four small Doric columns of carved oak. The interior is finished with panel work containing about all the woods of the State, among which are manzanita, madrone, yew, laurel, myrtle, ash, mapie, oak, spruce, balm, fir, sugar pine, bird's-eye pine, cherry, curly naple and abler. The house forms the Oregon pavilion in the forestry building." recent editorial correspondence to the St. Joseph (Mo.) Heraid; "Adjoining the exhibits of Missouri in both the horticultural and agricultural buildings are the displays of Oregon, the Legislature

of which State appropriated a scant (60, 000 in all for the purpose of properly representing the State's resources and industries at the World's Fair. The conrepresenting the State's resources and inductions at the World's Fair. The configuration induction at the World's Fair. The configuration induction is the World's Fair. The configuration is some at the World's Fair. The configuration is some at the World's Fair. ## FROM WASHINGTON CITY.

Further instructions in regard to the acceptance of Chinese certificates have been issued to the Collector of the port of New York. The order calls for the detention of Chinese upon the vessels bringing them to this country until the Consular certificates are fully investigated and until the bearers are fully ture him identified; in fact, until there is not the salmon, which is the only variety packed slightest doubt as to their right to enter there in large qualities, are running now the United States.

July of \$17,237,606. The increase during the last twelve months was in round figures \$9,000.000. The per capita circulation, based on the estimated population of 67,066,000, August 1 was \$24.02.

and the conclusion drawn that Hawaii-ans do not want annexation. Minister Stevens' act in raising the American flag \$15,000,000 worth of certificates of the and landing the marines is referred to at length, and the report puts that indi-pany of Minnesota are affoat in the

been the desire not of the people, who according to the principles of this govaccording to the principles of this government have the right to govern, but of the few. The report will probably not be made public until sent to Congress. When published the popular feeling in favor of annexation will. it is believed ounces, leaving a shortage of 2,116,000 be made public until sent to Congress.
When published the popular feeling in favor of annexation will, it is believed, be allayed. The result of the report, so

layor of annexation will, it is believed, be allayed. The result of the report, so those who have seen it say, will be that the government will permit the Hawaiian so govern themselves, and no other government will be allowed to interfere.

That a desperate fight is to be made to repeal the Geary Chinese exclusion act during the extra or regular session of Congress is no longer doubted by those interested in Washington. While Representative Geary claims to have learned nothing definite as to the administration's attitude toward the law, he acknowledges that it would not surprise him if there were a mighty effort made by the enemies of the bill to either repeal it in Congress or originate some other plan to nullify it. Mr. Geary would neither affirm nor deny the report that the Chinese Six Companies had levied another assessment on all Celestials in the country to raise a corruption fund to lobby through its repeal at the coming session. He did say, however: "It is possible that the Six Companies will not be able to collect the \$5 per head assessment said to have been recently levied. Chinamen are very much dissented the surprise of the world assessment said to have been recently levied. Chinamen are very much dissented the surprise of the world assessment said to have been recently levied. Chinamen are very much dissented the surprise of the world assessment said to have been recently levied. Chinamen are very much dissented to a surprise and better that the country of the control of the control

SEVERAL INSTRUCTIVE NOTES.

Good feed makes good eggs. Curl is better than milk for fowls. Wash dirty eggs before marketing

A little charcoal is good in the feed Clean water, where they can always get it, is needed by the chicks. The back of the seat of the buggy not the place for hens to roost.

Keeping the center of the stack well conneled up is a good point in stacking either hay or grain. Keep a daily account of the receipts and expenses with the poultry, and know

Have your horses shod by a blacksmith that does not cut the frog away so far that the weight rests on the hoof. If a horse is given grain ration, we know of no better bulky feed than bright upland prairie hay. It is fragrant, pal-atable and free from dust. Do not become alarmed at the culti-vator beam breaking an occasional fine

whether they pay or not.

stalk of corn; the plowing pays for the trouble and the loss of a few large stalks. The need of ice is now being felt by a great many persons. It is neither difficult nor expensive to put up a small amount of ice. Suppose you try it next winter.

Do not allow harvesting to keep the field of late corn from having a needed plowing. The last plowing destroys many weeds, and usually increases the yield materially. If there is a time when dark stables are allowable, it is during hot weather. But darkness does not necessarily imply dampness nor lack of fresh air. Have the stables ventilated even if you do not

the seeds have matured. Comparatively few weeds will ripen seeds if this is done.

It is a good thing to know how to renbecome.—Exchange. It is a good thing to know how to ren-ovate land after it has become run down, but far better to know how to conserve its fertility and so avoid the slow and laborious methods of renovation. The

The use of soiling crops is slow to ob-tain among Western farmers, but we be-lieve they are making some headway each year. The one thing that prevents their wider adoption is the labor re-quired. As land increases in value we an afford to spend more money upon abor, if it enables us to do more work

with a given number of cows. HOW TO MAKE THE PARM PAY. It is quite as important to harvest and

ore the crops carefully as it is to plant rels, weevils and other insects destroy and damage grain after it is in the bins and cribs. These losses are preventable. The "old beaten track" is not the one which will always lead us more quickly or even more surely to success in agri-culture. New ideas and new methods or even more surely to success in agriculture. New isleas and new methods have come up in every branch of farm practice during recent years, and many of them have already been tried and found good. A prejudice in favor of old ways should not keep one from being progressive, says the Wisconsin Agriculturist. Read. study and keep up ways should not keep one from being progressive, says the Wisconsin Agriculturist. Read. study and keep up ways should not keep one from being progressive, says the Wisconsin Agriculturist. Read. study and keep up with the times. Very many farms which are now unproductive or barely paying texpenses could be brought up to a very profitable state of cultivation merely by underdraining. Where tile is difficult to procure or where the expense is thought to be too great an excellent substitute may be made with boards or stones. Good farming is very often thrown away on land which is too west to produce good crops, and before wasting more time and strength in this way the land itself should be put in proper condition. Put some of the surplus manure on the meadows, hauling it out and spreading evenly through the fall and winter. Grass will run out rapidly if not fed. It pays just as well as to fer-dilize grain. Some neglect this and wonspreading evenly through the last and winter. Grass will run out rapidly if not fed. It pays just as well as to fer-tilize grain. Some neglect this and won-der that they get such poor crops, and conclude there is no profit in grass.

ABSOLUTELY PURE A Washington woman gives the following story of her experience at Oberlowing story of her experience at Ober-Ammergau She and her sister went one lovely June day to see the "Passion Play." On their way home they over-took a party of peasants who were re-turning from having viewed the holy spectacle. The Washington woman had curiosity enough to find pleasure in talk-

> reached a particularly interesting group she invited an old woman to get into the carriage with her. When the old woman had seated herself she turned to the Washington woman and asked "Are you a princess?" 'No. I am not a princess." answered the Washington woman.

"But you have a carriage and a pair "Yes, but I am not a princess. "I am eighty-four years old, and this is the first time that I have ever ridden in a carriage," replied the old woman. Then she sat stient for a few moments. and tooking up again asked inquiringly:

"Did the Lord Christ tell you to take me into your carriage?
"Yes, I think so," reverently answered the Washington woman.—New York Commercial Advertiser.

The Observation Game

Bright eyes and quick wits were at a reminm at all the watering places during the snumer. The game that was decided the most popular is the observa-tion party. On the table are placed fifty or sixty objects. Over these is thrown a bright cloth, which completely hides them from sight. The players gather around the table, the cloth is removed for three minutes and during this time each one is to observe as many objects as he can. At the end of the three minutes the table is again shrouded in mystery, and each player is given ten minutes in which to write the result of

moving the weeds late this month before the seeds have matured.

To the African native the estab lishment of a colony like Natal is like saving of manure, turning under green crops and rotation are the means to this very desirable end.

Hishment of a colony like Natal is like throwing open the gates of paradise. He streams in, offering his cheap The production of manure deserves as careful attention as the production of any other crop on the farm. It should be regarded as a crop and as one of the most valuable ones. In order to save it without loss there should be a watertight stable floor and enough of fine about 11 by 12 by 13 by 15 tight stable floor and enough of fine absorbents to take up and retain the liquids, and from the moment that a white population will not work in the fields, on the roads, in the mines, in the factories, its doom is practically sealed. It is limited to supplying

employees, merchants, contractors, shopmen and foremen to the commu-Sooner or later the black race will be educated to a point at which it will demand and receive a share in those employments and in the government. Whenever that happens the white race will either be absorbed and cultivate properly. Some farmers seem to overlook this fact. The percentage of hay and grain wasted because of poorly-constructed stacks and leaky barn roofs is unnecessarily large. Do not suffer from these causes. Rats, mice, squirely waster and be perpetuated in intermarry and be perpetuated in the persons of a few hundred, or, it may be, a few thousand, mulattoes and quadroons .- "National Life and

It Fixes Mosquitoes To clear the room of mosquitoes take a piece of paper rolled around a lead pen-cil to form a case, and fill this with very dry Persian insect powder, putting in a little at a time, and pressing it down with a pencil. Set this cigarette in a cup of sand to hold it erect. An hour before going to bed close the room and set the cigarette on fire. One will be sufficient for a small room, but for a large room two will be required.-De-

A professor of the Paris Academy de Sciences has been making experiments, which have resulted in convincing him that the rabbit is, of all living things, the most capable of withstanding a very low temperature. Inclosed all night in a block of ice, a rabbit was found next day getting on very comfortably and evidently not aware of anything very peculiar in his circumstances.—New York Journal.
