The amount received by Secretary Morton from an agent in Oregon fully confirms previous reports regarding the shortage of certain crops in many sections of Europe, which he represents is likely to generate a demand for American foreign crops...

There are 3,700 national, 3,000 State and 1,300 private banks in the United States. Diamonds worth over 45,000,000 were sold in one lot recently by the De Beers Company of South Africa to a syndicate. Irrigation 25,000,000 acres are made fruitful in India alone...

The United States has just begun the work of improving the waste area, and has already about 4,000,000 acres of irrigated land. In Great Britain the actual number of persons engaged in agriculture is 2,561,000; in manufacturing, 5,180,000; in commerce, 7,985,000...

The thousands upon thousands of diamonds which have been made in the Philadelphia savings banks more than half are boarding-house keepers. The saloons of Chicago employ 24,000 persons. Killing and preparing of hams, costing 12 cents, are required...

Some London music-hall shams, lately sold, show that business is good. The Tivoli sells at nearly 200, the Pavilion at 125 and the Empire at 350. Customs frauds in the importation of opium in France have been discovered...

Wigan sums up the argument in a very clear manner. He says: "I think it may be assumed without risk of contradiction that the fact of each brain being perfect and a complete instrument of thought is abundantly proved. That each, while in health, corresponds in action with its fellow is obvious from the fact that this union and correspondence give only one result, as in the case of two eyes producing single vision; that when from any cause one brain is disordered a discrepancy in the two processes of thinking is the result...

Commander Henry Glass, United States navy, Captain of the U.S.S. Albatross, has received orders from Washington to appear before the Board of Naval Examiners for examination for promotion to the grade of Lieutenant Commander.

The difficulty of guarding effectively the United States coast against the invasion of Mexico, and the North and South has been frequently made apparent. Chinese come in from Mexico and Canada; alien contract laborers, to say the least, and now the provisions of the Alien and Smuggling Act are being enforced...

The demand for currency has brought out the old fractional script, government and other, issued in 1891. The works have for years been in collections or have been forgotten. The Eastern and Western coal sales agents at New York have decided that the September output shall be 53,000,000 tons instead of 2,750,000 tons as previously reported...

The late Editor Buck of the Spirit of the Times was a friend and exponent of the peace cause. He was a man of high qualities won for him troops of friends everywhere. He was a generous fellow withal, as was shown by his having left a large sum of money by will to his friends in the cause of the peace cause...

The census of foreigners resident in France shows a total of 1,130,211. The Belgians are most numerous, and next to them stand the Italians. Since 1851 the number of American residents has increased from 5,000 to 12,000. "Bread and butter dances" are a late form of entertainment designed by the Parisians...

ADAM AND EVELYN. A noted writer on fowls says: "For laying hens select large, strong, healthy birds of the Leghorn varieties, with large, square bodies, with deep red, pink or fine points, such as pure white, flat ear lobes, or very yellow legs, or comb with just five points, or plumage that is perfectly white in the entire variety, or without a white speck in the brown. It is not that these points are any detriment to the health and vigor of the birds, but that they have been too often sacrificed to them, which often results in a strain of enfeebled though handsome fowls. The Leghorns are acclimated American breeds, which originated from birds brought from the Mediterranean, and they have been improved in this country by circumstances that have given them a pre-eminence position in the fowling world. Birds such as are above recommended are selected. Other breeds or crosses from them are much better than the Leghorns or any of the smaller breeds. There are, it is also a good table fowl, and are good to cross on Brahmas or to breed with the first-mentioned cross, as they keep up size and quality. Plymouth Rocks are also a good table fowl, and are good to cross with the above."

Every tin cup in the police stations of this city now has a hole punched in its bottom. The police commissioners wondered at the disappearance of so many cups some time ago and caused an investigation to be made. This showed that the policemen were in the habit of carrying cups of water to their sleeping rooms to quench their thirst during the night. In this way the cups were mislaid and never returned to their proper places. Many remedies were suggested, but without avail. The cups were tied by chains and strings, but they continued to disappear. At last an ingenious member of the department suggested punching a hole in the bottom of every cup. Then it would be impossible for them to hold water any length of time. The inventor did not secure a patent, and in all the station houses his plan has been adopted.—New York Times.

Representatives of Italian exhibitors at the Chicago Fair called on Director-General de Young at the Board of Exposition at San Francisco, and asked for 15,000 square feet of space in the mechanical and fine arts building, which is more than it will be possible to give them in that structure. They may agree to take 12,000 feet of space and have their exhibits divided between three of the buildings. It is the opinion of the Italian Commissioners that the foreign exhibitors at Chicago will want a large amount of space, and they don't think the plans for the fair buildings are on a scale large enough. The Director-General said that, if the financial condition were somewhat better, he would enlarge the buildings, but under the circumstances he did not think it would be practicable. Space at the fair will be of two kinds—within and outside of the buildings. The Hawaiians, Chinese and Japanese have located space outside, and will construct their own buildings. Reports from the interior are encouraging. In several quarters active preparations for big exhibits are going on, and many of the countries have made appropriations for collecting material.

At a meeting of the W. C. T. U. at Bridgeton, N. J., Mrs. Townsend presided that God would paralyze the Excise Board and remove it before it granted any more licenses. A week later Samuel W. Wells, a member of the board who was found in his office paralyzed, and death ensued in a few hours. A gold medal was found in the stomach of a Texas steer slaughtered at Chicago last week. The medal is in the shape of a Maltese cross, and bears the inscription: "Awarded to Miss Ida Work, Ursuline Academy, Dallas, Tex." Armore & Co. have written to the convention, stating the medal is subject to their order.

A party of union and non-union painters, while discussing the merits of their position in the labor world at Chicago, became angry and began fighting. Because the crowd which followed. He was cornered, and the crowd pelted him with stones. He fired at the mob several times, and hit a woman's block off. A police officer finally reached him, and knocked him down.

Thomas A. Edison comes of a long-lived stock. His father is still alive at Port Huron, Mich., at the age of 90. His grandfather was 103 years old, and two of his uncles lived to be 90 and 92 respectively. Samuel Edison, the father of the inventor, looks forward to many more years of activity. He is very proud of his famous son, who is known to the family as "Al."

Ex-President Benjamin Harrison's lectures at Stanford University have been postponed until February, because, as is announced, he has other duties pressing upon his attention in the East. The series will begin February 10, and the series will run through till the middle of March. To most of them only the students will be admitted, but a few, which will be on some popular subjects, will be open to the general public.

The Prefecture of Police in France has established a service of identity in order to identify released convicts. Since 1880 there have been 1,500 sentences recorded against men named Louis Lefevre in the country, by which innumerable innocent Louis Lefevres have been brought into trouble. The London Times makes the prediction that Great Britain will require at least 25,000,000 quarters of wheat from abroad this year. France, it adds, will be compelled to import more than twice as much as it usually does, and it notes the fact that Germany has already begun to draw on America for supplies.

How Westerners Regard the East. One very noticeable peculiarity of the people of Colorado is their habit of speaking of the east as "home." "At home" in the east we call that Virginia crosser," said one. "I go home to New York every few months," said another. "We long to go back east to our homes, but when we get there the climate does not agree with us, and we hurry back to Colorado." Thus was revealed the peculiar tenure the place has upon thousands of its citizens.—Julian Ralph in Harper's.
