incl soon effaced from the memory. The expenditure for this work runs up into the thousands, for \$1500, seemingly, will not begin to pay the bills for men and materials for a week. The rain increases the difficulties, for the head of water outside drives out whatever loose material there may be under the cofferdam and lets water through. Near the upper end of the dam the flow has become so great that there a small dam is being built on the inside of the main one. later in the season, when the days get built on the inside of the main one. Water is forcing itself in atother points. As a final annoyance the mud at the bottom is being continually kept in commotion by the action of the pumps. But though the sacrifice is great, when the Portland General Electric Company has once and Electric Company has once are credit its concrete wall behind the conferdam, it will have the foundation for an electric power house than which mone will equal it west of the Rockies. The great quantity of turbine wheels, wide-mouthed draft tubes, shafting and other iron material that lies in heaps, near the lower end of the lock-canal, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in succession joined the small pyramid, when the fifth ant floated on top of four in the days get in and the made, and the intended and the many that the days get in and the made, and the intended and the many the made, and and and are a credit to meither. Mr. Flyan of Mulino spilled a number of ants into a dish filled with water. They had not taken lessons in swimming and struggled for dear life. The stronger crawled for dear life. The venison was delicated the sacrifice and the provided for the made and the sacrifice is gre

weaker and shoved him under then weaker and shoved him under then other iron material that lies in heaps their iron material that lies in heaps the rich lower end of the lock-canal, tells how vast the magnitude of the establishment will be. The score or more of dynamos are yet to come.
