AN INCIDENT IN REAL LIFE.

Showing How Unpleasant People Can Make I stepped upon a Broadway car at the lower end of Broadway and rode in it along that fast changing highway as far as Nineteenth street. At the corner of Chambers street and Broadway a man of perhaps 40 and a woman not more than 25, he carrying a huge portmanteau,

THE NEW ITALIAN MINISTRY.

than 25, he carrying a huge portmanteau, a collection of wraps, two umbrellas and a cane, she leading by the hand a 8-year-old baby, joined the partially crowded patronage already seated. A cloud of dissatisfaction rested upon the brow of the man. The frown of an already born rumpus fast unfolding into fruitage made forbidding and ugly the comely countenance of the woman. Her pervous disposition made itself known to every one in the car and particularly to the little boy as she yanked the child by the arm into the seat beside her. After a moment's silence the woman said,
"You might have known how it would
be," to which he responded, "Well, I
might have known, but I didn't, so shut

Another passenger entered the car at that moment and stumbled over the port-

manteau. "Hang that bag!" said the man.
"If I were you, I would keep my cussing for home," said the woman, and so

on and on and on.

The ensuing half hour was passed by these two in a strain which would have done credit to the most pronounced hag in the dirtiest quarters of a third rate fish market. The little boy, thank heav-en, went fast asleep. Much of the con-versation between the two was inaudible save to the three or four people in imme-diate contact with them, but every once in awhile the shrill voice of the female bird soared into upper altitudes of defi ance, making discordant the entire at-mosphere and attracting the attention of nearly a score of people. They got out at the corner of Fourteenth street and Broadway and entered a cafe—he

sullen, ejaculatory and profane; she keyed up to G in alt, defiant, shrewish, chock full of scold. Well, what of it? It is not such a very uncommon thing for man and wife-for quarrel and to vent serpentlike hisses from the unruly members that was with curious motion as they distill poison from bitter and jaundiced hearts. It is

not so uncommon, I admit, but isn't it always suggestive? I thought as I looked at the man, with a good, square, clean forehead, well marked brows, a clear akin and an air of self poise, that he was hardly doing himself justice. Save that his hands were rude and rough and that his boots were country made, that his portmanteau was considerably older than the ordinary hill and that his um-brella looked as though it might have been utilized by Mrs. Noah when she came from the ark, he was a man of the

world in appearance. Has hair was parted in the middle, women's hair should be, and revealed in year has turned out the worst since the vulgarity. Her eyes were brown, soft appearance of the phylloxera and pero- at that; her teeth were regular and clean; her dress was neat, her hands and feet well clad, and an occasional pat upon the boy's shoulder as he lay nes-

tling against her, fast asleep, indicated the feminine nature, the affectionate ten-Listening under the circumstances was not rudeness. It was compulsory. I sat next the boy. Some of his banana skin ment. As he lay semicoiled up I noticed the copper nails in the bottom of his shoe ment. As he lay semicoiled up I noticed the copper nails in the bottom of his shoe and the copper toe upon the same. The group was easily and perfectly within my vision. As word after word fell redhot I thought: How odd this all would have sounded in that shell-like ear five years ago. Enw strange it would have seemed to the lover had he heard it or had it been suggested to him that ever tental.

Crude rubber is worth from 40 to 75 cents per pound, and yet a pound of hose or packing costs very much less. This would be hardly practical if it were not for the advances that have been made in the art of reclaiming or recovering rubber, which can be done at the total cost

ber, which can be done at the total cost of about 3 cents per pound. There are several large factories in the country devoted solely to this purpose, and a great many manufacturers do recovering on a small scale at the seat of the production of new goods.

These old goods are placed in large tanks at the place of reclaiming. A solution of muriatic or sulphuric acid and water is poured upon the waste, and the whole set to boiling by a system of steam pipes passing through the tank. After 10 or 12 hours' boiling the cotton fiber, which is found in all rubber manufactures and which is the serious drawback in the reclaiming process, disintegrates and falls into a powder, and there is no difficulty then in the use of the waste.—

Leigh Hunt, that early day sesthete, declared breakfast to be the meal of all others when the poetic influence of a table posy was most to be desired. He would bring in a few clover heads or sprigs of grass culled from beneath the protecting bars of a park railing or city square if he could find nothing more eautiful, and with these to look at his fancy took him roaming out into boundless green fields and pastures new.-Chicago Tribune.

The last annual circle of wood leaves The last annual circle of wood leaves an accumulation of living cells upon its surface, and toward midsummer these cells produce an abundance of new ones until the aggregate is sufficient to form a new annual layer. This process on gusting nuisance.

When we take into consideration what a blessing a well-ordered creamery is to the community, it is hard to feel charitable toward a badly-ordered one. The first is a good thing; the second a disput of the pedigree stock. Such a breed would be gusting nuisance.

A recent English invention is a screw propeller in which the blades can be ad-justed for maneuvering or can be feath-ered for running under sail.—New York

He-I've asked you three times to marry me. How many more times do you want me to ask you? She (tenderly)—Only once, and let that once be 50 years hence.—Detroit Free

It is said that a syndicate of Swiss and English capitalists has been formed to utilize a part of the falls of the Rhine at Lauffenburg for the generation of electric energy. The water will be led at Lauffenburg for the generation of electric energy. The water will be led to turbine wheels and 7,000 horse power

FARM AND GARDEN.

Way in Which a Dairy Barn Should be Built.

THE RABLY-HATCHED PULLET.

Carefully Breeding and Selecting to Secure Fall and Winter Layers Short Pointers.

I wish to give as briefly as possible what I have learned by experience in carefully breeding and selecting to secure fall and winter layers, as our egg market here in Central New York is the best as mutton, \$175@2.00; lambs, \$2.00@2.25.
Hoos—Choice heavy, \$4.50@5.00; medium, \$4.00@4.50; light and feeders, \$4.00@4.50; dressed, \$6.50.0.

**EASTERS BOOKED MEATS AND LARD—Hams, medium, \$18213%c per pound; hams, large, \$123@131%c; hams, picnic, and upound; hams, large, \$123@131%c; hams, picnic, and the sum of the sum o

VEGETABLES AND PRUITS.

The potatoes, Oregon, 75c per sack; onions, \$1.25 per sack; sweet potatoes, 1½c per pound; Oregon celery, 35@50c; tomatoes, \$1.25@1.50 per box.

FRUITS—Sicily lemons, \$5.00@5.50 per box; California new crop, \$4.00@4.50; be stabled in an L to that barn, extending to the south, so as to get sunper box; bananas, \$1.50@3.00 per bunch; Florida oranges, \$4.50 per box; California navels, \$4.00@4.50; seedlings, \$3.00@3.50; Mexican, \$3.50@3.75; lapanese, \$2.00; grapes, \$1.00@1.25 per box; apples (buying price), green, 60@75c per box; red, 65@90c; cranberries, \$9.00 per box.

STAPLE GROCERIES.

baless than thirty-four feet wide for two rows of rows and nine feet clear on the inside, and each cow should have at least three feet four inches of space to stand in, and a half partition between each cow if possible, and one between every other cow in any event, and these cows tied either with halters or suspended stanchions. Buch a stable, with loft for hay or straw, ready for the cows, can be built for not far from \$16 per cow, and is in every way better for a dairy of cows than it is possible to construct a basement stable; and when once made it can be kept dry and free from chilliness, which is the "damper" on profitable milk-making in the winter. In our opinion the great castle-like barn has no place in the economy of the modern dairy. What is wanted is a perfect as possible stable, and the barns that already exist may be cheaply made to hold and protect the feed for the stock in the more concentrated form of silage, clover, hay and the grains that are now considered essential in making up the balanced

Better grow into dairying than go into A rough hide is a sign that something A safe rule to follow is to cultivate all

newly-planted fruit trees the same as a crop of corn or potatoes. Some people are not very particular about eating dirt, but they all object to paying for it at prices of butter.

Inspect flocks often during warm weather to see that maggets do not get on the animals. They cause trouble.

Do not breed from grade sires if it can be avoided. They always give the prog-eny a greater chance to inherit "scrub" qualities. The progressive dairyman cannot af-ford to use anything poorer than a first-class buil. The future of his herd de-pends upon him.

One of the principal points in ma a success in dairying is that of pro-ing a uniformly first-class product ing all seasons of the year. Cover the pits of blackcape now if you wish them to root. Better plants will be obtained this way than if they are left to do their own rooting. The money expended for pure-bred male animals is one of the best invest-

ments that can be made, and gains com-pound interest in a short time. An apparatus for spraying will soen be counted a necessity where fruit is grown. It is the only successful way of fighting many insect and fungous pests.
