MOVEMENT OF CURRENCY. New York, September 22.—A movement of currency of some magnitude is in progress, the objective point being New Orleans. The bulk of the money is not shipped in the regular way by express, but from the banks that are taking advantage of a 75-cent rate given by the subsidiary here for telegraphic transfer through the subtreasury at New Orleans, by which interest is saved, as delivery is made at once and all work of misarrangement is avoided.

LOS ANGELES, September 22.—An evening paper to-day published a letter from a man signing himself "S. F. THE NAVAL BATTLE.

The Engagement at the Mouth of the Yalu River. LONDON, September 24.—United States cruiser Chicago sailed this afternoon for Havre, where she will be docked. She will return to Gravesend in ten days to take coal.

Whether the Chinese succeeded in their object does not appear, but the question is whether it was worth such a risk for the sake of landing the troops. It certainly was bad management to get so close in shore, for two of the Chinese vessels were destroyed, and so went ashore. That is one reason why the Japanese did not try to pass through the Chinese line, for they would have gone in to all eyes and become entangled. It was a big engagement for modern vessels, but I see nothing yet to lead me to suppose that the engagement will point to the reconstruction or remodeling of our vessels.

What interests me most is to know the manner in which the battle was fought. Upon this point we have nothing but the word of the Japanese, and that is that they were successful in their attempt to carry a great force across the water. As a general rule, the mere crossing of a hostile fleet is a feat not to be undertaken lightly.

THE TIMES' LEADER. It Discusses the Main Issues of the War at Length. SALTING THE BUTTER.

EVIL EFFECT OF INFERIOR SALTS. Question Involved in Some Dismissal When a Definite Answer is Required as to the Exact Amount of Salt to a Pound of Butter.

The question of salting butter is involved in some difficulty when a definite answer is required as to the exact amount of salt to a pound of butter. All of which depends on the taste of the customer. One customer likes as much as one and a half ounces to the pound, while another desires no more than a half ounce.
