decidedly common. Scorpions are none too rare in the southern portions of the territories, and in all parts centipeds of 7 to 8 inches long are frequent and neighborly. But the chief distinction erudite professor. At the Chautauqua of the region in this respect is the presence of the pichu-cuate, the deadliest snake in North America. The pichu-cuate matches the worst

serpent of India. Not only the most highly venomous, but the tiniest and most treacherous, he would be also the most dangerons—but, luckily, he is the rarest. He is the only true asp on this continent, and in the United States is never found outside of New Mexico and Arizona. That he was also known to the ancient Mexicans is apparent from his name-pichu-coatl, an Aztec word,

which was brought up to our territory by the Spanish conquerors.

Aire. I was out hunting jack rabbits, in company with some Indian friends, and had dismounted to stalk, leading my pet horse by the bridle. My eyes were on a small chapparo bush ahead, when suddenly Alazan snorted and reared backward so violently as almost to unhinge my arm. I looked about in surprise, for Alazan was too good a horse

Again he protested and with evident terror, and chancing to look at my very

feet I understood his fear and felt very grateful that his senses were better than mine, for in another step I should have walked upon my death. The only thing visible was a tiny object, not nearly so large as a good stag beetle-merely a head and perhaps an inch of neck. But it was the most

frightful object in its kind that I had ever seen. The head, certainly neither so broad nor so long as my thumb nail, had a shape and an air of condensed malignity impossible to describe. It seemed the very essence of wickedness and hate, fairly bulging with deadly

spite, and growing upon one until it looked several times its actual size. The ugly triangle (which is the distinguishing mark of all venomous snakes, being formed by the poison gland back of each eye) told me at once that Alazan was keeping up his reputationnever did he shy at a harmless snake-

and the tiny horns, which added a pe culiar and grotesque hideousness, left no doubt that this was a pichu-cuate. He had buried himself most to the head in the gray sand, against which his up-

It is of vital importance that it should be un-deratood by persons whose kidneys are inactive that this condition of things is finally inductive of a state of the organs where life hangs in the balance. Bright's disease, diabetes, albuminuria are all diseases of a very obstinate character in their mature stage, and all have a fatal tendency. They often baffle the most practiced medical skill and the most approved remedies of mate-ria medica. But opposed at the outset-that is to say, when the kidneys begin to discharge their functions inactively – with Hostetter's Stomach Bitters, the dangerous tendency is checked. Very useful also is this household medicine for those aliments of common occur-rence-constipution, bitiousness, dyspep-ia and nervousness. It is a safeguard against malarla, and averts chronic rheumatism. without loss of time. The idea of retreat never seemed to enter that flat head. Sometimes he would lie and puff out with impotent rage, throwing his mouth so wide open that it seemed the venom must start, and sometimes he glided toward me, his head an inch above the ground, with an attitude which seemed to say, "Stand still there, and we'll see who langhs." At last I killed him. He was neither

larger round nor longer than an ordinary lead pencil; a cold, leaden gray "Where's yer daddy?" "He's plowin'," "And where's yer mammy?" "Makin' nim plow!" on the back, but underneath rosy as the
