THE MAGNETIC GIRL An Explanation of How Her Tricks May

Easily Be Duplicated. While in Chicago I saw the announce ment of an electric girl who included in her repertory a new trick, or at least one that I had not yet seen. A stick of Rev. Dr. Rainsford, the well known

about four feet long and as thick as a broomstick was produced, and I and another gentleman were requested to hold it in a vertical position before us while grasping it firmly in both hands. The girl, standing in front of and facing us. placed the palm of her open hand against the lower portion of the stick, resting it on the side nearest to us and farthes from herself. After rubbing her hand up and down for a few moments in order "to make better electric contact," as we were informed, and after enjoin ing us to hold the stick perfectly vertical, we were told to press down on it as hard as we could.

This we did until the veins seemed to stand out on our foreheads; but, exert ourselves as hard as we could, we two strong men, were unable to press down hard enough to make the stick slip past the open palm of her hand. Had the girl grasped the stick with her two hands, I am sure she could not have withstood my downward pressure alone. I would have borne her, stick and all, to the floor. But there she stood, with but one open hand bearing against the side of the stick, and both us could not by our united efforts force the stick past that wonderful hand. Surely there seemed something uncanny about this. But it is very simply explained.

The whole secret consists in insisting upon the men holding the stick in a vertical position. When the girl's open hand is first placed against the lower portion of the stick, she moves it two or three times up and down, pulling gradually more and more against it. As this tends to pull the stick away from the vertical, she insists that the men keep it straight. Thus cautioned, they will exert more and more effort until, when she feels that the pressure against her hand is sufficient, she instructs them to push down with all their might. They do so and imagine that they are exerting a tremendous vertical thrust, whereas their vertical effort is actually very slight-insufficient even to overcome the friction of the stick against her moist hand. The men are really exerting a tremendous effort, but are deceived as to its direction. With their hands tightly grasping the upper end of the stick they are really trying to force the other end of the stick against the palm of her hand.—N. W. Perry in Cassier's Magazine.

WHY WOMEN MAKE POOR DETECTIVES A Secret Service Man Says the Opposite

Sex Make Bad Spies. "Women are not good detectives," said an experienced secret service man on being asked his opinion. "To begin with, there are many places to which a woman cannot go without exciting sustant me, and I told him he couldn't be too woman cannot go without exciting suspicion, and this defeats her object at

unfitted by nature for detective work. 'In the first place, she jumps at a conclusion and acts on it in opposition to all human probabilities, possibilities get rid of him, and I did write it.

SMASHINGTRADITION

WILD ANIMALS IN CAPTIVITY ARE NOT DANGEROUS.

lames A. Bailey Says Any One Can Safely Enter and Leave a Cage Full of Lions and Tigers, and Any Man Who Knows the Cues Can Put Them Through Their Acts.

Said Mr. James A. Bailey recently: It is the general belief all over the world that a man who goes into a den t wild carnivorous beasts takes his life in his hands, and that each time be does so and escapes unharmed he has won by a lucky chance. Some persons clieve that if the trainer who handles the animals in their acts were to turn his back upon them for a single instant they would leap upon and devour him. Others again believe that the lions and tigers only wait an opportunity for concerted action to destroy their er, while there are still others who declare that it is only through the power of the human eye that the beasts are held in subjection. To all of these opinions and beliefs and as a final answer to all questions on the subject I wish to state here and now that there is no danger whatever to any person entering a cage of wild beasts. Such a statement, however, will scarce be believed without some further explana-

been maimed and some killed by lions and tigers in menageries and zoological gardens throughout the world, but in every case, I venture to say, the causes leading to such accidents and deaths were of their own making. Unmerited or too severe punishment is the most frequent cause. Nearly all animals, no matter how small and insignificant, will turn and fight when cornered and in fear of their lives. A cat will make a desperate and determined fight if so placed that it cannot escape from what it believes is a dangerous enemy. Just so with larger cat animals. And nearly all of the accidents that have occurred have been brought about by the brutality of trainers who, having lost temper, have pursued to extremes an animal that did not understand what was wanted of it. Trainers of the present day, however, have come to realize this, and accidents are of rare occurrence. And I maintain that any man or woman, as entire stranger to the animals, can go in with them and in perfect safety.

"A case in point comes to my mind A few years ago I employed an innocent sort of German to work in the menagerie, and one of the first tasks assigned to him was cleaning the lions' den. Instead of taking an iron scraper and ary, he took a broom, opened the iron door, went in the cage and began to sweep the floor. When a lion got in his way, he would punch it with the broom and tell it in German to got away, and it did so. The man repeated his experience every day and was never harmed. I now make this positive statement— that in both the handling and training of these animals there is no more danger than attends the training of a do nestic animal. The snarling and growling of the beasts are no more indicative of a desire to claw and devour than is expressed in the bark or suarl of a canine house pet or the hiss of a sleek The big brutes may growl and crouch

imagine, to perfect the training of these animals, and every trainer has a method of his own. I would further explain that trained animals will not perform the tricks taught them until the cue is given them. Even trained horses, which are supposed to have great intelligence. the poet, has not distinguished himself in | will only go through their performances when the ringmaster supplies the cue, may take a rise in whatever it may be. Sometimes it is a motion of the whip, at others a step backward or forward, when instantly the animal will respond. Now, all that is necessary for any one to put through his performances any kind of trained animal or number of them is for him to

ert Burns II, the know when to give the proper cue. "I do not believe the animals know one trainer from another unless on has been with them for a long time, for when some of my trainers have been taken sick, been discharged or for other causes have left my service the trained animal part of my show has not been interrupted, but has gone on just the same, a new man having been substituted, and it is safe to say that the animals never knew the difference between the men. I have changed the men as often as five times in a season, and one man has put the beasts through their tricks quite as well as another. Any person who will enter the arena fearessly and confidently can take the trainer's whip and make the animals perform as well as a person who has handled them for months, provided always he knows what tricks the beasts are required to do and can supply the

"I am aware that this statement may appear to most people extraordinary, because it is at variance with their preconceived notions concerning the brutal nature of all wild beasts, but I am firm ening them and it is perfectly free from in my belief and have no hesitation in every objectionable substance. making it public."-New York Sun.

A young woman in Denver is soon to start paper called the Kiss. Contrary to the usus custom, it will in this case be considered a mis

Self praise is no recommendation, but there are times when one must permit a person to tell the truth about himself When what he he says is supported by the estimony of others no reasonable man wil doubt his word. Now, to say that Allcock's Ponous Plastes are the only gen
uine and reliable porous plasters made is
not self praise in the slightest degree.
They have stood the test for over thirty
years, and in proof of their merits it is only
necessary to ca'l attention to the cures
they have effected and to the voluntary nials of those who have used the Beware of imitations. Ask for ALI BRANDRETH'S PILLS arrest the progress of decay.

New York is abo t to have another census of ber citizens. She seems to enjoy that perform ance as hugely as a small boy counting over hi marbles.

Brings comfort and improvement and ends to personal enjoyment when ightly used. The many, who live bet-er than others and enjoy life more, with ss expenditure, by more promptly dapting the world's best products to he needs of physical being, will attest he value to health of the pure liquid exative principles embraced in the emedy, Syrup of Figs.

Its excellence is due to its presenting n the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect lax-ative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kid-neys, Liver and Bowels without weak-

Syrup of Figs is for sale by all drug-gists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup package, also the name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered. Co. only, whose name is printed on every

## Rich Red Blood

The blood has as its most important ele-ments, small round corpuscies, red and been badly

white, in proportion of about 300 red to 10 ninished and the white ones increased diminished and the white ones increased the blood is impure, thin, lacking in the left in my system to appear in an itching nutrition necessary to sustain the healt i

and nerve strength of the body. Then That Tired Feeling, Nervo Serofula, Salt Rheum, or others of the long my blood, up to a year ago last winter, whe train of ills, according to the temperament

and disposition, attack the victim. The only permanent remedy is found in a reliable blood medicine like Hood's Sar- Hood's Sarsaparilla, and after using that saparilla, which acts upon the red cor and a half of another bottle, the sores and puscles, enriching them and increasing hum r disappeared. I attended the Christ-

ing, Scrofula and all other diseases arising from or promoted by low state of the blood.

That these statements are true we prove not by our own statements, but by what thousands of perfectly reliable people say about Hood's Sarsaparilla. Read the testimental in the next column from a beloved clergyman. Then take
