THE TRADE REVIVAL.

Many Lines of Business Manifest an Improvement.

New York, May 6.—R. G. Dun & Co.'s review of trade tomorrow will say: Business begins in May in better condition than at any other time since the breakdown in May, 1893.

Business begins in May in better condition than at any other time since the breakdown in May, 1893. Smaller in volume than then, it is not shrinking but enlarging. The chief obstacle to a more complete recovery is the anxiety of many to pluck the fruit before it is ripe.

Holdings of some staples have lifted them so far as to prevent their marketing; consumption of materials in some branches is checked by advances which cannot be realized for finished products; workers in some industries are demanding wages that cannot be paid out of any business.

Checked and not infrequently the outlook of labor troubles, which are brightening. The money markets continue healthy, and with heavy sales of railway bonds abroad, the deficiency in public revenue, \$8,742,840 in April cannot so apprehension. Demands for full restoration of wages to the level of 1892 have closed many woolen mills and threaten to close others. The strike which closed the iron furnaces at Newcastle, Pa., has just ended without success, and other strikes have stopped numerous works about Pittsburgh.

Pennsylvania coke-workers are on strike, and one is threatened by Alabama coal-miners.

The speculative fever grows more serious, as is natural when business starts up with prices at extremely low points, but by lifting wheat from 62 to 69 cents, Atlantic exports have been checked, and the market for Europe, only 1,672,197 bushels, against 2,017,040 last year. The close was at 68 1/2 cents. Western receipts are now larger than a year ago, and except in parts of some states, the promise for the next year is excellent. A sale of 300,000 bushels of the Newmarket, Pa., furnaces, now over, stiffened. Bessemer furnaces, now over, stiffened. Bessemer furnaces, now over, stiffened.

The iron works at the Wheeling mill stiffened bills, while Southern makers have nominally advanced their prices so they have been made here 60 cents for the Newmarket, Pa., furnaces, now over, stiffened. Bessemer furnaces, now over, stiffened.

ACUTE PHASE PASSED

England Accepts the Guarantee Made by Salvador.

Washington, May 4.—The department of state received this afternoon a cablegram from Ambassador Hayard stating that Great Britain had accepted the guarantee made by Salvador for the payment of the indemnity by Nicaragua in London within a fortnight, and that as soon as Ambassador Corinto confirms the guarantee and so informs the British admiral, the admiral is instructed to leave Corinto.

This official statement, given out at the state department after 4 o'clock this afternoon, may be regarded as chronicle of the passage of the acute phase of the difficulty between Great Britain and Nicaragua, which at one time perhaps threatened to involve the United States. It cannot be doubted that Nicaragua will promptly confirm the arrangement, and that the British fleet will leave Corinto as soon as notice of the action of the British foreign office can be communicated to Admiral Stephenson, which, by the admiral's order, had not the Nicaraguans purposely interrupted the communication by cable directly between the foreign office and the admiral.

The guarantee by Salvador of Nicaragua's independence, it is said, is simply a repayment of a favor extended to Salvador by Nicaragua at the time of the Ezeta incident, when Dr. Guzman, the Nicaraguan minister at Washington, took up the case of Salvador by instructions of his own government.

It is certain that all the countries of Central America have been deeply impressed with such fear. It is felt here that the Nicaraguan incident may perhaps be the direct means of bringing about again the long-expected revival of the union of Central American republics, the small republics now existing having been brought to a realization of their inability of protecting themselves in conflict with any considerable power.

Although it may be safely assumed that the acute phase of the Nicaraguan incident has passed, supposing that there should be no hostile coalition between the foreign and local governments on each side, there are yet some matters to be adjusted before the incident can be regarded as entirely closed. After the statement of the "smart money" claim on account of the treatment of Hatch, a commission must be selected, and a realization of their claims of other British subjects not officials, who were expelled from Bluefields at the time of the outbreak last summer, and if this commission assesses damages against Nicaragua on this score, there may be some grumbling on the part of the Nicaraguans. This is not likely to lead to serious trouble, but the Nicaraguans, smarting under the sense of oppression in this case (for they declare that Hatch had never been an exonerator, and so was never recognized by them as a British official), may be led to do everything they can without a good cause for an open rupture, to give their patronage in the future to any other nation than Great Britain.

ALL IN THE FAMILY. The Suit of Young Spreckels Against His Father for Slander.

San Francisco, May 4.—The depositions are being taken in the \$100,000 damage suit of C. A. Spreckels against his father, John Spreckels, the sugar king, for slander. C. A. Spreckels devoted several hours yesterday to telling why he sued his father for slander. Claus Spreckels will tell today why he made the statements to which his son takes exception. The statements of each will be used in the coming trial. While the young man could not mention any particular occasion where he had suffered financially, he said his general reputation had been injured. All of the Spreckels' millions, he said, would not recompense him for the damage done his standing in the community. The suit for slander is based on an article published several weeks ago in which Claus Spreckels was quoted as saying that C. A. Spreckels and his younger brother had attempted to defraud him of a large sum of money, and that C. A. Spreckels was a poor business man and would soon be bankrupt.

Harcourt Created Excitement. London, May 4.—The Times says that great excitement was caused in the lobby of the house of commons at yesterday's sitting by Sir William Vernon Harcourt's announcement in presenting the budget, that it might be, and probably would be, the last time in which, from responsible position, he would be able to address the house on finance.

The Times says this language is capable of but one meaning. Whether dissolution comes in the next few weeks or later, it is obvious that the present parliament has run nearly its course.

Customs Tariff Amendment Bill. Berlin, May 4.—The Reichstag today passed a customs tariff amendment bill. The measure includes a paragraph giving the government full power to impose additional duties as reprisals for hostile duties of foreign states, but providing that discriminating duties on the free list shall not exceed 30 per cent ad valorem. The measure raises the duties on perfumes containing alcohol from 300 to 300 marks, and imposes a protective duty of one mark on the free list, used for tanning purposes. The new tariff measure goes into effect July 1.

Italy's Demand of Brazil. Rio de Janeiro, May 4.—The Italian charge d'affaires has demanded that Brazil reply should within seven days to the claims made by Italy for losses sustained by Italian subjects during the late revolution.

Admiral Meade's Squadron. St. Joseph, Mo., May 6.—A local paper announces an authority of a letter from Washington that the United States Atlantic squadron, under the command of Admiral Meade, will visit Newfoundland waters this summer, where it is likely it will meet the British fleet, under Admiral Erskine.
