LABRADOR'S COAST.

Shores, Rolling Surge and Many Icebergs Make It Dangerous.

The most northerly lighthouse on the coast of this continent stands on Belle lale, at the head of the straits of that name, a little northeast of Newfound-By what freak of taste it was salled Belle isle I cannot say, for even the old navigators had such a horror of it that on their charts they marked it with the figure of a demon.

The morning the little mail steamer n which I cruised "down on the Labrador," as the Newfoundlanders say, plunged and rolled past it through the urge the rugged mass of rock crouchd there as if ready to seize its prey of thips and human lives. The surf, unheard at our distance, flashed around is base like a long row of glistening teeth. A huge iceberg had drifted in and lay stranded at one end of the island; far up on the rocks was the lighthouse; on a shelf below stood a little but, with provisions, for shipwrecked sailors; the gray morning mists made these look heavy and sodden, and altogether this glimpse of Belle isle was he most desolate scene I had ever beheld. Over our bow the barren coast of Labrador was faintly outlined, and as the last lighthouse on the continent drop-ped astern I felt that we were indeed drawing away from civilization, and this feeling was strengthened when, as we turned our prow northward, we sighted the vanguard of the seemingly andless procession of huge icebergs drifting slowly down in single file from the

nysterious regions of the north. We had met with single bergs along the Newfoundland coast, but off Labrador they became a constant and unspeakably grand feature in the seaward I doubt if they can be seen anywhere else except in arctic and antarctic waters in such numbers, variety and grandeur. The branch of the gulf stream which pushes its way into the Arctic ocean has sufficient force left when it is reflected by the frozen northern boundary of that sea to send an icy current own along the Labrador coast. Practically all the bergs that break loose from the ice sheathed shores of Greenland are borne southward by this current. One morning, when I went upon deck, I counted no less than 135 huge Some of these were great solid blocks of ice; others were arched with numerous Gothic passageways; some reached with spirelike grace high up into the air. All reflected with prismatic glory the rays of the sun. - Gustav Kobbe in St. Nicholas.

Hard and Bitter Wills.

It was remarked by a writer long ago that "there is no revenge so hard and bitter as that of an old man." and it is one of the astonishing perversities of many natures that the longer they live the harder they hug their possessions. The most disinterested affection is pass ed over, the most faithful and most valuable services are slightly and grudgse notably afflicts the richest. The Marquis d'Aligre was a singular example. His will was concocted with a special desire to disappoint and insult his relatives, friends and servants. To the first it said: "As for you, my relatives who have been so long spelling upon this fortune on which 'I had concentrated all my affections, ' you are not going to touch a penny of it, and not one of you will be able to boast that you have squandered the millions which the old Marquis d'Aligre had taken so many

Sir Robert Bevil, one of James I's officials, did not even spare his wife. 'I give unto my wife tenne shillings in respect she took her sonnes part against me and did anymate and comfort him afterwards. These will not be forgot-And the Earl of Stafford, who married the daughter of the Duc de Grammont, wrote: "To the worst of women, Claude Charlotte de Grammont, unfortunately my wife, guilty as she is of all crimes, I leave five and forty ass halfpence, which will buy a pullet for her supper. A better gift than her father can make her. "-Westminster Review.

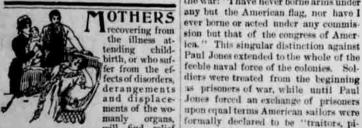

Of all the wretchedly underpaid American consuls we think the case of our representative at Santos, Brazil, is the worst. This unfortunate individual -a Maine man-receives the munificent salary of \$1,500 a year. His expenses are \$3,000 a year. He has buried his vice consul, has had yellow fever twice himself, resigns periodically, but still sticks pluckily to his post, waiting for his successor to be appointed and, what is more important, to accept the appointment. This consul deserves well of his country .- Bath Times.

An English paper says that on every

The Curse Omitted.

Christmas day since the Napoleonic invasion of Russia in 1812 a prayer has been recited in all the churches of the czar's empire, calling down the curses of heaven upon the French. Indeed the anathema formed part of the Christmas day liturgy of the orthodox church. But on last Christmas day, Russia and France having become friendly, the czar ordered the cursing prayer to be omit-

THE DECLINE OF WAR.

Williams' Medicine Company.

Pursuit of Property and Wealth the Main

The warlike temperament of man has been one of his most prominent characteristics from the earliest times. To most primitive peoples and has been a leading occupation of all civilized ones. Armies have grown in size, weapons have multiplied in number and destructiveness, battles have grown more and more deadly in action, while also becoming more merciful in their accompaniments, but still it is everywhere apparent that, in spite of these aids to arnage, the military spirit is on the

May we not look for the cause of this in the enormously increased cost of warfare and its interference with the puruit of prosperity and wealth? When the internal losses to a people become greater than those they can gain through conquest and annexation, they will be very loath to enter into a great conflict. I am very far from saying that many ther causes, such as ethics and a growing spirit of mercy, may not have contributed to this pacification of the naions, but is it not true that the cost of war is the chief preventive of war? If so, does it not illustrate the rule that the reactions set up by the vast technical improvement of methods of destruction have reacted on the primitive cause of the destruction-viz, the human will-

ular Science Monthly. Thackeray on John Paul Jones "Traitor, if you will, was M. John Paul Jones, afterward knight of his most Christian majesty's Order of Merit, but a braver traitor never wore a

Such were almost the last words traced by the hand of Thackeray, and they show the astonishing misconception of Paul Jones which prevailed in the mind of one of the justest men that ever lived. Washington was a hero even to his enemies, yet Washington had actually held a commission in the British army, while Paul Jones could say to the American congress at the close of the war: "I have never borne arms under any but the American flag, nor have I ever horne or acted under any commission but that of the congress of Amer-This singular distinction against Paul Jones extended to the whole of the feeble naval force of the colonies. Soldiers were treated from the beginning as prisoners of war, while until Paul Jones forced an exchange of prisoners

Diamond Cutting Not only is diamond cutting not a specially high paid occupation, but it one involving a most bumiliating ystem of espionage to the worker. Each ran is held strictly to account for the tones he receives on going to work in morning, and the count has to be arefully taken when the unfinished work is turned in at night to be locked up in a safe against the return of the rkmen the next day. The possibilities of theft are great, though a dishonest workman knows that an attempt to dispose of an unfinished stone would bring espicion upon him wherever the at-

tempt was made. - New York Mercury.

There's beauty in the dawning light.
And twilight fair or starlit night
Has each its charm and grace.
But lovelier still on earth to me,
The fairest thing my eye can see—
The beauty of thy face.

There's calmness on the ocean's breast, As deep and blue it seems to rest 'Neath bluer heavens above. But deeper, calmer, still to me Than ever sea or sky can be, Thine szure eyes, my love!

There's music in the running stream, And music when the woodlands seem Awake with songs of birds, But sweeter, dearer, still to me Than nature's voice can ever be, The music of thy words.

—G. Roxby in Chambers' Journal.

A QUAKER JULIET.

In the beginning of the present century Philadelphia was a quaint and picturesque city. Commercial greed had not obliterated old landmarks, and picturesque features were protected alike Samuel R. Jordan has just given the by municipal ordinances and public sen-Journal an account of his life, which, timent. Rows of fine trees bordered in view of his extremely hard lot for the streets, and these were tended and the past few years will be read with cared for by householders. This was especially the case on Third, near Walnut, which was made beautiful by a line

So great was ing on Sunday, after enjoying an exhiltheir efficacy that it was deemed wise to place them within the reach of all. They are now manufactured by the Dr. Williams' Medicine Company, Schenectady, N. Y., and are sold in crowned with feathers like a bunch of broom corn, leg of mutton sleeves, muff and gloves laced to the elbows, attended by her colored groom in laced hat and coat. The dauntless young lady folded Polly in her ample embrace, kissed her, and in her usual resolute voice proposed then and there that she

come out to the Woodlands to dinner. Like a flock of startled hens the Quaker matrons rescued Polly from the wilderness of tulle and india muslin, the fashionable dress of the time. Miss Rebecca laughed joyonsly as she resigned her friend and walked away, and live to fight has been the chief aim of then poor Polly was taken in hand, warned, entreated to avoid the world's people and their vanities, etc., and reached home upon the whole not displeased with the adventure.

Before the week was out she had visited the Woodlands, had seen the pictures and was led in to dinner by a very handsome young gentleman from Virginia described by Miss Becky in her curt speech as a "Jimmy Jessamy from the Tidewater," name Francis Dulaney. The dress of this gentleman would surprise a nineteenth century belle, although it was de regle 100 years ago. A canary waistcoat rigged with flowers in red silk, claret colored coat with deep cuffs, laced steel buttons big as toy saucers, claret breeches and stockings, buckled shoes and steenkirk cravat smartly laced. Very commonplace people looked like stately gentlemen in such apparel, while in the hideous uniform of today the Apollo Belvidere might without discrimination be taken for the butler or undertaker.

Mr. Dulaney made himelf very agree-He told of his life in Loadon when he had been a student, of his lonely plantation in Virginia, his widowed mother and sister who had married in and have lessened the cause by modify-England, and Polly, to ber surprise, felt ing the heart and brain of man?-Popas if they had been friends for a long time, and then Becky carried her off, warning Mr. Frank that he must not go philandering about Third and Walnut as it would make trouble. On the road nome the girls had a long talk, and Polly made up her mind that the first era in a girl's life had opened for her. She had a lover, and, as is always the result, such knowledge gave her, with a sense of responsibility, a new feeling of self confidence and respect.

It was a fact. Mr. Francis Dulaney was in love with the beautiful Quakeress, and Becky Hamilton took charge of the courtship with characteristic energy. After three months spent in alternate hopes and fears Francis Dulaney pro-

posed and was accepted by Mary Pen nell, and at once Frank announced his

intention of calling on her father. Next morning that gentleman found himself standing in front of an utter stranger, handsome and well dressed, who announced himself as a suitor for the hand of his daughter. The old sailor had never been so taken aback, but after many earnest words and entreaties declared himself as firmly and unalterably opposed to such a union, and his visitor departed.

And now the hardest was to cometo see and reproach his daughter for her infraction of duty and respect to her parent. He sent for her. Never had she seemed so beautiful, but there was something matured, a quiet firmness in her eyes he had not noticed before, and to his amazement be learned that she had pledged her faith and would keep it. He had bent refractory men to his will, but knew that he was powerless

here, yet resolved to try. He had a maiden sister in New York. and he at once sent for her. Aunt Patience was not a bad woman according to her lights, but looked on a love affair as a device of the evil one, to be met and baffled at any and all risk. Her

niece met her with firmness and refused to give any pledge of renunciation what-ever, and with her hand on her lover's last letter declared ber fidelity to him while life lasted. She was forbidden to leave the house unless attended by her Torquemada and made every one, in-

cluding her brother, weary of life. But an arrangement for action was made. Mr. Pennell had never yielded in his life and, moreover, believed he was promoting his daughter's temporal and spiritual welfare in hindering her mar-riage with a worldly person, and he had resolved to take passage for England, accompanied by Polly, and this arrangement be supposed to be entirely secret.

In the early part of October, 1800, he left the house on some business errand, while Miss Patience, after giving every one a blowing up, retired to her room to arrange it. She had not sooner entered than the watchful Creesby locked it on the outside. Gid, Mr. Pennell's own black servant, a crusty old fellow. was sent into the cellar and secured by padlock, and then Polly, looking stairs, paused a moment on the threshold and then bade farewell to her old home.

Followed by her maid, she crossed into Third street, and there under the big buttonwood that was standing at the the Hamilton tilbury, and in a moment her hands were clasped by her lover and Miss Hamilton.

"Drive like the deuce, Solomon," was the command, and in half an hour they reached the Woodlands. It was a joyous party. Becky and her two sisters ordered everything done at once. John Inskeep, who had been inaugurated mayor of Philadelphia a few days before, performed the marriage ceremony. drew Hamilton gave away the bride. and all were happy. ON THE SCRAPBOOK PLAN.

Evangelist Moody Makes Up His Sermons From All Sorts of Material. Moody's method of sermon making is original, says McClure's Magazine. In reality his sermons are never madethey are always still in the making. Suppose the subject is "Paul." He takes a monstrous envelope, capable of holding some hundreds of slips of pa-

per, labels it "Paul," and slowly stocks it with original notes, cuttings from papers, extracts from books, illustra-tons, scraps of all kinds, nearly or retotely referring to the subject. After numulating these, it may be for years, he wades through the mass, selects a number of the most striking points, arranges them and finally makes a few jottings in a large hand, and these he arries with him to the platform. The process of looking through the whole envelope is repeated each time the sernon is preached. Partly on this account and partly be-

or disproportionately amplifies others, no two sermons are ever exactly the same. By this method also-a matter of much more importance—the delivery is always fresh to himself. Thus, to make this clearer, suppose that after a thorough sifting 100 eligible points remain in the envelope. Every time the sermon is preached these hundred are verhauled. But no single sermon, by a mere limitation of time, can contain, say, more than 70.

Hence, though the general scheme is the same, there is always novelty in the arrangement, for the particular 70 vary with each time of delivery. No greater mistake could be made than to imagine that Mr. Moody does not study for his sermons. On the contrary, he is bursting with fatness, appears the moment breakfast is over, and the stranger who enters at almost any time of day, except at the hours of platform work, will find him with his litter of notes, sither stuffing himself or his portfolios with new points he has picked up through the day. His search for these "points," and especially for light upon texts, Bible ideas or characters is cease-

REAL RAZORBACKS.

HOMELY AND FEROCIOUS HOG ON HIS NATIVE HEATH.

aunt, who had begun to rule like a she He Does Not Resemble His Pampered Brother of the Berkshire Breed-His Existence Measured by the Rule of "Root, Hog, or Die"-Hog Killing Parties.

There is a great difference in hogs. The form, contour and face of the nded, sleek sided, short legged Berkshire and other hogs of high degree do not much resemble the angular, razer backed hog common throughout the south. The countenance of the well bred, well cared for species is chubby and contented looking, the ears small, the snout inclined to turn up rather than down. His less fortunate consin has a long, narrow face, immense, flophis eyes, and an elongated, pointed spout that seems providentially formed to aid his earthy explorations. "Root, hog, or die," is a common saying in charming, but rather pale, came down the country of which this hog is a nasituation. They have long legs and always run with their snouts close to the ground, convenient for unearthing anything eatable which may come in their corner of Willing's alley until 1851 was way They diligently root up the promising morsel of food and gulp it down, without stopping to enjoy it, and run on apparently faster than ever, grunting as they go, in search of something

of grass or berry root, upon which they largely depend for subsistence. ative exercise they take ranging through the woods effectually prevents their tak ing on much superfluous flesh, and the bair on their narrow backs is as rough and coarse as that of the well bred hog is smooth and glossy. The majority of yells of Aunt Patience and Gid, seeking haps spotted with black, and when a release. He went to England shortly white coated one, scantily covered with hair, has pale eyes, bound around with pink, and very light eyelashes, protruding beneath his drooping ears, he is as agly a living object as can be imagined.

more-some favorite acorn or juicy bit

The little pigs are moderately pretty when young, but not in the least like the plump, little, chubby faced baby Berkshire, and long before they have arrived at the age when they are called shotes" they have become ungainly and common looking. The negroes have great faith in the ability of the bog to survive any amount of neglect and still live to provide sausages and pork stew for the winter season. At certain seaons, when the "shotes" can do no damage to the maturing crops, it is necessary to confine them until the fields are bare once more and will admit of their ranging at will.

in the course of a walk once, a small negro boy and girl were found seated on top of the fence which surrounded a nen, flinging corn to two hogs within the inclosure. The rude feeding trough was as dry as if no liquid had ever dampened it, and this on a hot summe afternoon. Inquiry as to when the prisoners had last had water given them elicited no response from the shy little 'shote minders." After some inquiry and explanation that the pigs would like water the boy consented to go to the house, some distance off, for a bucket, after bringing which the children went to the spring, in a little hollow in the woods behind the pen, and procured water for the thirsty creatures. It is needless to say that they drank it with cause in delivery he forgets some points avidity. This pen was in an open field, with not a single bit of shade near. It ment, the house and barn of which had been moved to some other tract of land. and the owner of the hogs had utilized the pen just where it was, the distance from his dwelling, which was plentifully supplied with well water, rendering it most inconvenient to attend to wants of the animals.

The pen could easily have been moved, as the fence around it was made of movable rails placed zigzag fashion on purpose that it might be changed from to place, but evidently the comfort of the "shotes" was not regarded as of much importance. Later, a small, slim figure, in a scant, homespun dress, faded and torn, suddenly emerged from always studying. When in the evan-gelistic field, the batch of envelopes, road, and a childish voice said timidly. 'Do you want some headache blossom ma'am?" a little black hand holding out a bunch of delicate pink flowers, with perfume more powerful than sweet. The acceptance of this offering seemed to thaw out her reserve, and the little girl volunteered the information that she and Yankee, her brother, "aimed to dash water to de hog ebery ebenin." In the days of the old regime the crops were all fenced in, and the hogs, and cattle as well, were allowed to roam You can talk about the mosquitoes at will through the fastnesses of the of New Jersey or Florida," said C. T. swamps and timbered tracts Oftenmonths. When the time drew near for hog killing, parties were made up to 'drive' the swamp and capture the half wild creatures, as it was desired to swine became quite ferocious, having been left so long at large, and the hunt-'wild boar" hunt in earnest, which they hugely enjoyed Most of the farmers of the southern states now leave their crops unfenced, and the stock has to be pastured or looked after, which practice
