USEFUL INFORMATION CONCERN-ING FARM WORK.

The Cow Ought to Be Kept For Profit -Propagating Strawberries by Runners-Effect of Salt on Milk-Horse Meat as Hen Food-Notes.

The poorest tool on the face of the earth is a poor oow. It is not only that she is no profit, it is worse than thatshe runs you in debt. Still worse is the case if the poor cow be one of a herd, and for this reason: If a person keeps but one cow he very soon knows if she be good or bad, but if he keeps a good many, the worthless cow is not so readily detected. She may be a smooth looking animal, and may even give a fair flow of milk, and yet she may not only fall short of paying for her keep, but be eating up all the profit made by her neighbor, and so the farmer has not a cent of gain on the pair. And the useless cow is not only deteriorating as years go by, but is per-petuating her worthless kind, to the loss of her owner and to the detriment of all the country around. The form and features of a good dairy oow have been so often described that only a brief mention is needed here, but some of the Siuslaw fishermen's strike last fall.

The Pendleton Wool Scouring Company has declared a 10 per cent dividend. It is thought that it will take the present one of \$25,000, making a points are so essential that they can good cow must be long, level, loose-tool that only a brief mention is needed here, but some pany has declared a 10 per cent dividend of 5 cents a share, or a total of \$25,000, and good cow must be long, level, loose-tool that only a brief mention is needed here, but some points are so essential that they can good cow must be long, level, loose-tool that only a brief mention is needed here, but some pany has declared a dividend of 5 cents a share, or a total of \$25,000, and good cow must be long, level, loose-tool that only a brief mention is needed here, but some points are so essential that they can good cow must be long, level, loose-tool that only a brief mention is needed here, but some points are so essential that they can good cow must be long, level, loose-tool that only a brief mention is needed here, but some points are so essential that they can good cow must be long, level, loose-tool that only a brief mention is needed here, but some points are so essential that they can good cow must be long, level, loose-tool that only a loose-tool almost a year to scour and pack this total of \$100,000 paid within the past fine legs, long, light neck, clean out year's crop.

Arrangements are being made to ship

Elberton wants to be an incorporated deep flank, thin, flat thighs, and rich, soft, mellow skin, showing a deep orange color under any white markings, and inside of ear. As viewed from the side, she must present a perfect wedge shape, exceedingly deep behind and very light in front, and, as viewed from behind, she must show ample room to carry a large, full udder with ease and without chafing. No cow can do this that is of a beefy conform-

ation and that has not a good "arch." Propagating Strawberries. The varieties of strawberries mainly cultivated in this country are propagated from the runners. The first pro-

duced are usually the strongest and best for early planting, but those that are tormed later in the season are equally as good when they arrive at the same age or size. A few theorists have maintained that the first plants formed near the parent stool were the only ones that should be used, and the only ones that should be used, and that they were far superior to the others and would always be more prolific. This assertion is not supported by facts; consequently is not worthy of a moment's thought. To insure the rooting of runners, the surface of the soil should be kept loose and open, and if the weather is very dry at the time they are forming, it is well to go over the beds and cover the new roots as they are produced. When only a few very large and strong plants are wanted it is well to pinch off the runner just beyond the first plant, and this may become stong and vigorous.

NUTS — Almonds, 4@6c; p that they were far superior to the oth-

The work observed and the general opinion among the fruit men of that section is that early fruit was injured, in some localities ruined for this year, while some think the trees were killed in many orchards by the recent cold snap. Late fruit probably has not been greatly damaged, and comparatively few late fruit trees were killed.

T. Letsom met with quite an acoident while en route to his ranch on Indian creek, in Grant county, last week. The road on the grade was quite narrow and icy, and, in attempting to go over it, his wagon slid off the grade. The road on the grade was quite narrow and icy, and, in attempting to go over it, his wagon slid off the grade, taking his team along, falling a distance of about forty feet into the creek below. Neither Mr. Letsom nor his team were seroinsty injured.

The mines closed down by the recent arity seaming resuming the fruit men of that section is that the gradulty resuming arity so as salt aids very much in the digestion of the food, and it is the digestion of the food digested that regalizes the quantity and quality of the food digested that regalizes the quantity and quality of the food digested that regalizes the quantity and quality of the food digested that regalizes the quantity and quality of the food digested that regalizes, in the globe, pigs' feet, 40s, \$3.25; kits, state, quality of the food digested that regalized, proposed to the quantity and quality of the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the quantity of the food digested that regalized, proposed to the quantity of the food digested that re the breaking down of the glandular tiesue of the udder and this never contains more than a normal quantity of water. The kidneys are charged with the removal of any excess of water from ment of train service, except that it is the blood, and this drain or oultet, is ways attend to its own business, and if it does not or cannot, for any reason, the milk glands cannot perform this function, but the cow becomes diseased at once. But this is a question that the careful farmer will never have to consider, because he will always take care that such a supposed mistake will never happen, says a writer upon the subject. It is only the careless farmer who runs risks of giving his cows, or permitting them to get, too much salt.

Horse Meat as Hen Food.

Hundreds of barrels of cooked horse meat are sold every winter to poultry raisers, according to the Agriculturist. The horse fiesh is cooked in tight tanks under a steam pressure of forty-five pounds. This penetrates every particle of the meat, purifying and cooking it thoroughly. In this form the meat will keep from one to four weeks, according to the weather. There is

meat will keep from one to four weeks, according to the weather. There is no practical way of preserving horse meat for any length of time. Where it cannot be cooked by steam it should be boiled. The meat might be salted the same as beef, but it would have to be freshened before being used, and it is a question whether it would then be a safe feed for hens. It is a good food.

\$2.25@2.50; dressed beef, 4@5½c per pound.

Morron—Gross, beet sheep, wethers, \$2.75; ewes, \$1.50@2.25; dressed mutton, 4½c per pound.

VSAL—Gross, small, 5@6c; large, 3

Hoss—Gross, choice, heavy, \$3.25@

3.50; light and feeders, \$2.50@2.75; dressed beef, 4@5½c per pound. safe feed for hens. It is a good food for egg production. One of the most popular brands of poultry meat on the market is made from carefully pre-pared and well cooked horse flesh.

Hens are very fond of mangels and

they are good for them.

Fresh raw meat and clover are good egg producers. But feed meat only

Eggs should be gathered every day in order to be of a first-class quality, less perfectly clean.

PORTLANC MARKETS.

A full supply of early California produce came in on the last steamer. A carload of bananas from New Or.cans has arrived this week. Receipts of eggs have been large, but quotations have changed but little from those of last week. The butter market is not so firm, and arrivals of Colifornia butter will probably bring about a decline. Groceries, provisions, etc., are unchanged.

Wheat Market.

The local market is dull, with no business passing, and quotations are nominal as follows: Walla Walla, 60c; Valley, 62 to 68c per bushel. From August 1,1895, to March 1, 1896, shipments of wheat from Portland amounted to 4,622,358 bushels, worth \$2,404,884.

FLOUR—Portland, Salem, Cascadia and Dayton, are quoted at \$3.15 per barrel; Golddrop, \$2.95; Snowflake, \$3.20; Ben-ton county, \$3.15; graham, \$2.90; super-fine, \$2.25.

OATS-Good white are quoted weak, at 27c; milling, 28@30c; gray, 22@23c. Rolled oats are quoted as follows: Bags \$4.25@5.25; barrels, \$4.50@7.00; cases,

Hay — Timothy, \$9.00 per ton; chest, \$6.00; clover, \$6@7; oat, \$5@6.50; wheat, \$5.50@6.50.

BABLEY-Feed barley, \$14.00 per ton; brewing, nominal.

Millsturrs — Bran, \$13.00; shorts, \$14; middlings, \$18@20.00; rye, 85@87c

per cental. BUTTER-Fancy creamery is quoted.at

BUTTER—Fancy creamery is quoted.at 55c; fancy dairy, 45c; fair to good, 35c; common, 17%c per roll.

POTATORS—New Oregon, 25@30c per sack; sweets, common, 3%c; Merced, 3% per pound.

ONIONS—Oregon, 60@90c per sack.
