Is entirely done away with by our shoes. In fact, they are a regular "Society for the Prevention of Cruelty to Feet" What are their methods? What are their methods? Perfect fit, prompted by respect to the shape of the human foot. A simple creed, but doesn't it cover the whole field? Then a shoe may treat a foot "shabbily" without being exactly cruel to it. That is to say, the shoe may lack style and wearing capacity. But ours have the wearing capacity and style along with the fit, and that should be enough to make you buy them.
