Mrs. H. W. Evans will move to Washington the first of next week to join her husband, who has work there in the lumber woods.

Our town is almost inundated by the prosperity wave. I think it is caused by the increase in the circulating medium brought here by republican strikers during pre-election days.

Ballast for the Southern Pacific road near Woodburn is being taken from the Canby gravel pit.

Miss Margaret Gettridge has been elected principal of the Canby school. Miss Mullen and Miss Vesta Knight will be the assistants.

Farmers living here have learned that the axles of the famous X Y Z mower must be oiled frequently when the machine is not in use. One man who neglected this duty found that the drive wheels would not turn when he wanted them to. They had rusted tight to the axle. At last, by a mighty effort, they were turned; but, alas! a 10 cent extra, which costs about \$1.25, was broken. And it was all the farmer's fault, because the agent told him it was.

Several important real estate transfers have been made recently.

The crop of railroad wood harvested last winter is now being marketed, so wood hauling is the order of the day. People living six miles from town who were able to make a living and pay their taxes before the golden age of trust rule and imperialism are now compelled to resort to wood cutting under serious disadvantages or fall behind in their accounts.

I don't like to see "Corporal" lay down his pen. He has delivered some telling shots—the one at coolie labor, for instance.

The editor of the Borealis points out the path of consistency to clergymen and urges them to follow it and criticizes them who do not. I suggest that the Borealis man take a double dose of his own prescription.

The camp meeting crop is good this season, the acreage exceeding that of all former years. The thing to do now is to form a trust on such institutions to control the distribution of religion. Indeed, the initial step has been taken by the Canby Campmeeting Association (Methodist) and the New Era Association (Spiritualist). In each case an admission fee of 10 cents is charged. It does not seem to me that an entrance fee is in harmony with the "without-money-and-without-price" doctrine, but undoubtedly it is all clear enough to theologians.

Some one has said that England secures territory by first sending a missionary to look after the natives, next a consul to look after the missionary, and next an army to look after the consul. It seems to be our way in the Chinese affair.

It has been the policy of Chautauqua's founders and local officers to make and keep the assemblies non-political; but, since precedent now counts for nothing, it is possible that the "scintillating stars" which are to be present this year

will try to shed their effulgence over imperialism and its chief prophet.

Professor Anderson closed his school on the 15th.

Farmers are sad when they think of the hay rotting in the shock and the grain turned red and yellow, but perhaps the fruit and potato crops will be all right. If not, then cord wood is the stuff. What a grand thing to live in a timbered country, where if one means fails, we can turn to old mother Nature, who always provides in some way if we have the strength to help ourselves.
