Deputy County Clerk Elmer Dixon on Monday made an abstract of tax rebates allowed on wire tire wagons, showing that up to date owners of wide tire wheels had received on taxes for 1899 the total sum of \$570.48. Only three or four of this number had more than one wide tire wagon. As the rebate came out of the road tax paid by the claimant, in many instances he did not get the full amount of \$1 per wheel. For instance, if the amount of the claimants road tax was only \$3.10, that would be the total amount due him as rebate.

George H. Gregory, the teasel-grower of Molalla, was in town Monday and stated that he and his brother at Carus, would begin harvesting 60 acres of teasels about August 1. They will employ about 40 hands to harvest the crop, and will keep considerable help to prepare the teasels for market, which, including the harvesting, will require about two months. Mr. Sawtell, the pioneer teasel-grower, has retired from business, but Gregory Bros. claim that by introducing some new methods they can still make the business profitable, each heretofore having had experience in that line in other sections of the country.

Farmers report the prospect for a good crop of fall wheat anything but encouraging. It is nearly the same complaint from every locality—a rank growth of weeds has crowded the wheat until it seems dwarfed. Dog fennel has assumed immense proportions, and new weeds are springing into a lively existence that were never before known to exist here. Something, too, seems to be sapping the strength of the stalk, and often between the second and third joints is found a black streak, possibly the work of some insect. It has been discovered that on the best cultivated ground, some that was summer-fallowed the previous year, the weeds are the rankest. New ground is not so bad. The hay crop is good, and there are said to be some fields of spring wheat that will yield well.

Coroner Strickland held an inquest Saturday on the body of Mrs. Katherine Habelt, who was burned to death at her home, four miles above Springwater, on the previous afternoon. The jury consisted of three men and three women, who returned a verdict of accidental death from burning. The Habelt boys have lived in that section for a number of years, but their mother arrived from Germany about a month ago, and was living with her son, Frank, who is unmarried. Frank and his brother went

The June issue of "The Camera" has the following to say about the Brownie Camera: "How they are ever made to sell for one dollar is more than we can understand. Just think of it! Here but a few years ago we paid ten and twenty times as much for Cameras that did not do the work half so well."

They are so simple that any school boy or girl can operate one successfully. Let us show you the Brownie Camera and what it will do.

away in the morning to work in a neighbor's hay field, and did not return until late in the evening, discovering that the dwelling had burned to the ground during their absence. The brothers then went to the home of the nearest neighbor, two miles away, to make inquiries as to the whereabouts of their mother, but she had not been seen. They returned home, and with the aid of a lantern discovered the body of Mrs. Habelt, with the clothing burned away and badly charred with the fire. The deceased was about 60 years old. She had evidently been trying to save some valuables from the house, when her clothing accidentally caught on fire.

* In the August issue of Everybody's Magazine the delightful autobiography of Stuart Robson grows in fascination. The light and shades of a great actor's career stand out vividly. It is a human

document—a confidence, and the reader shakes hands, as it were, with many famous figures of that day. The title for the month, in the series of Great American Industries, is "Where We Get Our Salt and How" and the "Simple Explanation" is of "Tides, Trade-Winds and Tornadoes" Elementary! Very likely, but everybody cannot explain offhand—Everybody's does—the theory of the tides, for instance. The short stories are all complete and peculiarly well chosen. The articles on "Britain's Fighting Elephants," "What a Bicycle Can Carry," "How Italy Robs Her Poor," "Dead and Dumb Soldiers" and "A Town Slipping into the sea" are well worth reading, in fact there is entertainment on every page of this issue and something more—intense interest.
