Barlow.

Barlow is a town of considerable importance. It is situated half way between two villages, known as Canby and Aurora, on the Molalla river, to which it is said by some of the citizens that the Willamette is a tributary, but there is one thing certain that there are no republicans here that are tributaries to Corbett. In fact, there is some talk here of reorganizing the republican party, many believing that the party now known by that name should be known as the corruptionist party, as there was never known so much corruption under any party king or emperor as is known to exist at this time. Wonder what is called the republican party? Let me see, I believe that Senator Carter, of Montana, is a democrat, and there you are. Why not try public ownership of all public utilities, mines and mining, the initiative and referendum, and election of senators at the ballot box. What's the matter with us democrats, populists and republicans. Are we never going to see that, which is for our own best interest? I would reply to our friend, George Ogle, but the people replied to George two years ago. Did you notice an editorial in last Sunday's Oregonian on Christian Science, Spiritualism and other items that the editor of the Oregonian knows nothing about. He even tried to quote Scripture by speaking about the witch of Endor, when in fact, there is no such person spoken of in the bible, which proves that Harvey Scott doesn't know any more about the bible than he does about the Lincoln republicanism.

Mr. Editor, please allow me to ask your new correspondent of Beaver Creek a few questions. First, can a person tell the truth, and say that they are walking in the way of the commandments? We think not. Second, did you ever see a person, who loved his enemies? We didn't. We don't believe the ten commandments are made to fulfill our religion, "Do unto others as you wish to be done by." If only such persons who fulfill those commandments would get to heaven, then the angels would be left to occupy the space alone. Don't impress such nonsense on the minds of intelligent people, who have more reasoning power than you have.

There are three weddings on the docket at present.

The Lord letheth the rain and sun shine over the just and unjust. Oh! How the heathens scooted when they heard our cannon sound. How the chopsticks rattled, which our commissary found.

When accused of the theft next morning he denied it bitterly but finally declared that someone had stolen his shoes and he had taken Mr. Pelkey's to get even. After consulting the deputy attorney, Mr. Campbell, who advised turning him loose, he was released and told to go home. The reform school is certainly the proper place for such a lad.
