KENTUCKY BABE. Molalla.

Again we hear the patter of the rain upon the shingles, and general order of gardening and farming will have to be postponed for awhile.

There is a large bear upon the Molalla that has succeeded so far in outwitting all the traps, dogs, men and poison that it has come in contact with. It has so far this spring killed and devoured 20 head of sheep and goats of faamers in this section. Three different sets of traps have been set to catch him. He takes the bait all right, but knows enough to keep out of the traps. On the night of the 19th, he killed and partly devoured a sheep on George Adams' farm. George set two traps for him, and he (bear) came as expected, took the re-mainder of the sheep, but left both traps undisturbed. The next morning several men with dogs started out to capture him. He was routed in a short distance of where he had taken the sheep, but the dogs could neither tree or stop him. He struck one of Fred Shaver's dogs and it will have to travel on three legs for some time. Some of the men saw the bear, but did not get a shot at him. He finally swam the river and escaped, and it is hoped that left the settlement for good.
