The Excuse

Made by many a man for taking a drink at the bar is that he needs a bracer. He feels weak, his stomach is "out of sorts" and liquor makes him "feel good."

The tired man who sits on a pin leaps up with new energy, but no one would say that this energy was evidence of the strength giving power of a pin. So with the energy induced by liquors. They only spur the body on, but do not strengthen it. Strength is made from food properly digested and assimilated. When the stomach is diseased there is a failure to extract the nutrition from food and the body grows weak. The weak body needs strengthening, not stimulating.
