Continued from page 6.

## Glad Tidings.

Ye correspondent will try and furnish a few items this week. The fall rains have set in, and there was a considerable rain fall during the week, and the rains are almost as muddy as they are in winter. Farming will be in full blast soon. Elmer Vaughan passed through our town Sunday. Miss Carrie Ridings left Friday for Jefferson, where she will teach school during the winter. Miss Jennie Washburn, of Parkers, is the guest of Miss Amy Hammond. Mr. Moore has his new house about completed, and it adds greatly to the appearance of his farm. We only hope that the weather will fair up during the Butte Creek fair. Ridings Bros. are still out baling hops.

## Marks Prairie.

Plenty of rain, and farmers are getting ready to put in the fall wheat. Several of our farmers lost considerable wheat that was stored in Hurst's warehouse at Aurora that burned last Thursday night. The burning of Hurst's mill at Aurora is a great loss to the community here in general. We learn that they will rebuild at once. Frank and Charles Oglesby visited the Portland carnival for a couple of days last week. The Misses Lucy and Alice Bonney, of Colton, were visiting relatives here the past week. Vern Ransdall has returned from Eastern Oregon, and is batching on the Ransdall farm. George and Frank Oglesby are at work at Bugby's mill. The trestle and bridge near George W. Taylor's place burned a few days ago, and our supervisor should have it rebuilt at once, as it is on a road that travels a great deal. The Glad Tidings man is still blowing his fog horn. We will say we do not have to cut off our whiskers so we can be the "big" man of a church choir and pose as a model of Christianity, and at the same time be the "biggest" devil in the sanctuary.

## Redland.

Mrs. Louis Funk and Bert Hart visited friends and relatives at Canby last week. Mrs. Behimer, of Hubbard, was waiting on her daughter, Mrs. Kimball, who has been sick. Albert Wright, of Heppner, was down having his land surveyed by Judge Mel-drum the past week. Ate Kamuscher is hauling away his produce, and disposing of his stock, as he intends to move to Portland this fall. Mr. Kimball and family intend to move to the mines in Washington as soon as they can dispose of their stock. Mr. Dew is disposing of his stock and intends to move back to Idaho soon. James Fullam and Louis Funk took a couple of loads of hogs to Portland last week, and while there they took in the carnival. D. O. Richardson went to Portland last week for a supply of oil and paint, he having obtained the contract for painting the creamery building at Stone. Bert Hart took in the carnival at Portland last week. H. A. Allen is tearing down the old Redland hall on his place. The young folks of this place gave Mr. and Mrs. Grey a pleasant surprise. Claude Stone has been elected to teach the Lower Logan school, which will begin Oct. 14th. It has been reported that several of our "young bloods" got their teams so badly mixed while returning from town that they did not know the difference until the next day. John Richardson has captured a coyote. Good for you, John! Mr. Dew has lost 10 head of sheep this summer, S. Fullam two head and L. Funk five head by coyotes and dogs. Miss Anna Hici bothem took in the carnival Saturday night. Louis Funk sold 20 head of lambs to Walsh & Brown the past week. Will some one please tell us why shorts and bran are selling \$16 to \$18 per ton, and wheat selling at 50 cents per bushel, and oats at 80 cents per hundred weight.

Some of our people are agitating a new precinct or enlarging the old one. Stone's creamery is talking of establishing a skinning station somewhere in this neighborhood. There will be three or four places to rent or sale here soon. Say, Mr. Editor, please give a definition of "Hell-west and crooked," as appeared in the report of delinquent tax sale two weeks ago in your columns. L. F.

## Barlow.

The rush season is about over, and the rainy season seems to be setting in. Health is good, and everyone seems to be well prepared for the long, dull wet weather that is approaching. Our school opened Monday with a fairly good attendance. Miss M. S. Barlow is teacher. The Barlow euchre club re-assembled at the hall last Saturday evening with a small attendance, but it will grow as the evenings get longer. An American that would refuse to sign an appeal to President Roosevelt to go to the relief of the Boers is not much of a friend to sister republics. Compel England to arbitrate. Lord Kitchner is Weyler, the Second. Uncle Moses Quint is boarding with R. R. Bratton.

The Barlow people sympathize with our neighbor village, Aurora, in the loss of its flouring mill, especially with the owner, Mr. Hartz. In fact, we feel the loss ourselves. Our new bridge across the Molalla river, is looming up in fine shape. It will be a beauty and joy for a long time, if not forever.

A good many teams are now hauling gravel for the road. We would like to see some sign of our Canby neighbors making a move on their side of the river road. We did considerable of the contribution work on our side last week. Get a move on you over there, boys!

The baby crop in Barlow this summer has been first-class. C. U. Barlow commenced drying apples Monday morning. He will have a good long run this season. That was a good joke on the Marquam fair butter judges. I won't give it away this time. Our Barlow ladies captured about all of the best prizes, and why not? For they are prize winners every time.

We would like to correct M. of Needy. Chester Ritter and Eva Hansen were married by Judge W. W. Jesse in Barlow instead of Oregon City, as was reported by M. Judge Jesse can tie as near a knot with as little ceremony as anybody in Oregon City, no cut in fees, though.

We send you a clipping from the Minneapolis Times; "The International Salt Company, which expects to obtain control of the salt mines of the entire world, has been incorporated in New Jersey with a capital of \$30,000,000 and will issue bonds to the amount of \$12,000,000. The new international trust is the outgrowth of the National Salt Company, which is interested in the salt producing plants in the United States. The new company will acquire the National Salt Company, the Retsof Mining Company, the English Salt Company and all the principal salt-producing properties in Canada and Great Britain." Wouldn't it be better for all if we, our government, manufactured all of the salt in the United States and sold it to us at cost. "What fools we mortals be."

The citizens of Oregon pay out millions of dollars to foreign insurance companies. Why don't (we) the state insure ourselves and keep that enormous profit at home. Will some one give a good reason why is G. W. Brownell present.
