PATRONIZE HOME INDUSTRY
OREGON CITY, NOV. 22, 1901.

TO SUBSCRIBERS.
The time of the year has arrived when an editor naturally feels as though a few dollars owing from delinquent subscribers should be forthcoming, and he kindly asks those knowing themselves indebted to the Courier-Herald to send in the money or pay the same to our agents or to postmasters. After January 1st we have decided not to employ any agents except postmasters, who are authorized to collect money for us. If you can't come to the office and no one calls on you, please see your postmaster, and he will fix you out.

We wish here to thank the majority of our subscribers for their prompt payment of subscription dues. All paid-up subscribers will receive a copy of the New Year Souvenir Number of the Courier-Herald free. New subscribers will also receive a copy free. This souvenir number will be larger and better than that of last year.

A few more pictures of farms, farm houses and farm scenes are wanted for the number.

THE ROAD TO ANARCHY.

In the spirit of the blackest kind of black-republicanism, the Oregonian of last week Wednesday justifies the refusal of Governor Durbin, of Indiana, to honor the requisition by the state of Kentucky for ex-Governor Taylor, who is a fugitive from justice, he having been implicated, with other republican politicians, in the murder of Goebel. The main point of the "great daily's" argument is that the accused would not have a fair trial in Kentucky. Since ex-Governor Taylor was honorably recognized and cheered by the late republican national convention, does it seem as though a democrat, accused of a political murder, would receive a fair trial in a republican state? Does not such a course lead to anarchy? The Commonwealth appropriately comments:

If the reasons presented by Governor Durbin are sound, then it is perfectly safe for a republican to kill any democratic executive and flee to a republican state, and if democratic governors act upon the same principle, it is safe for a democrat to kill a republican official and then flee to a democratic state. In other words, the position taken by Governor Durbin, if accepted as a precedent, invites a reign of lawlessness, and ought to alarm the friends of law and order, regardless of political affiliations.

In his "History of the Precious Metals," Alexander Del Mar, who never makes a statement unless he is positive he has the facts, says: "From a carefully guarded report of the chamber of mines (a British organization) for 1896, is gathered evidence to show that the Transvaal mines (mostly owned by British capitalists) have been worked from first to last by natives who were entrapped and forced into them against their will; that they were bought from contractors at so much per man, bound, strapped, made drunk with rotten liquor, and thrust naked into pits which avarice has dug and hypocrisy has covered over." Mr. Del Mar contends that the precious metals cost more to produce than they are worth. He shows that in the Transvaal mines, for instance, the salary of the free miner averages only \$1.50 per diem, concluding that it is quite evident that without forced labor, without slavery, and without working the mill on the Sabbath, the industry could not have been made to pay."

We are so accustomed to the compass that we forget what a wonderful thing it is and how little we know of it. The greatest scientist today knows scarcely more about why the compass acts as it does than did the first man who used it "in the early dusk and dawn of time." We have discovered that a magnetized piece of steel, swung on a pivot, will, as a rule, point in a certain direction. Why it does so is not known for certain, and perhaps never will be, though any number of ingenious and learned theories have been advanced. In some parts of the world the compass points due north, and in others it points to the east or to the west of north. And in some parts it will not act at all. At a place called Kotchetovks, in Russia, Profes-

sor Leyst, of Moscow, found that the needle pointed downward, just as it does at the magnetic pole. And yet there is no iron within 600 feet of the surface of the earth at that place. The whole subject of magnetism and electricity is full of miracles and mysteries.

According to Prof. W. B. Scott, of Princeton, horses in Western America began in the form of animals hardly larger than domestic cats, the remains of which are to be found in the Wasatch beds of Eocene time. Later on, in the form of the mesohippus, these animals attained the stature of sheep, and showed considerable advances in organization. In time the protohippus was developed, and it not only attained a greater size, but had a skeleton "so like that of a horse as to require a careful examination to note the differences." The change from the protohippus to the existing equus occurred early in the Pliocene. Yet "the true horse in the restricted sense of the term (species Equus caballus) was not developed in North America, and appears never to have reached this continent until brought here by the European settlers. For reasons which can hardly be even conjectured, the horse disappeared entirely from the Western hemisphere before the discoveries of Columbus, and continued to exist only in Eurasia and Africa."

EDWIN MARKHAM, the California poet, has investigated the squalid poverty in the sweatshop district of New York. He says, in summing up his conclusions from what he saw: "In these last days society is confronted by two gigantic evils—the trust and the sweatshop. These are typical of all the rest. They are the two giants destroying the industrial life of the republic. One stands for congested capital; the other for emaciated poverty. They are the redemptive and absurdum of the competitive system. They spring from a failure to justly distribute the products of labor. They both show the power of co-operative principle. They are the modern Titans who are shaking the public safety; so that everywhere the voices are beginning to cry: 'Let us consider the new duties of new occasions—let us build the New Republic.'"

The Customs Bureau is collecting revenue in the Philippines on the theory that they are foreign territory; the Internal Revenue Bureau is collecting internal revenue there on the theory that they are domestic territory. And each charges the other with inconsistency with the law. They are mistaken. As Congressman Grosvenor long ago frankly pointed out, we are in the Philippines to get out of them "all there is in it." These two revenue bureaus are each in its own way carrying out the exalted policy thus laid down. It having been settled that the Filipinos have no rights which we are bound to respect, "all that's his'n's our'n."

The Farmers' Advocate, a Farmers' Alliance weekly, established in 1889, published at Topeka, Kansas, has been summarily excluded from the mails by Third Assistant Postmaster-General Madden. The paper had received no previous warning that it would be an object of vengeance of the capitalist third assistant of that supposed-to-be servant of the people, our postmaster-general. There is more freedom in Canada than in this "home of the free," in a Pickwickian sense, and it is thither that the newspapers practically suppressed here, will move.

The Filipinos have held a convention in Manila, representing a constituency of 300,000. It asked that the United States establish a territorial government in the Philippines, give the islands a representation in the lower house of congress and two delegates in the senate, and authorize the local government to issue \$100,000,000 3 per cent bonds to run 50 years, to cover the ruin wrought by the war with the United States. These Filipino "rebels" seem more capable of self-government than England was in the time of Henry the Second.

PROFESSOR SHALER, of Harvard, is of the opinion that within 20 years the yield of gold from the veins or lodes in which it is associated with other metals, will alone amount to \$500,000,000 per annum. The output from gravel deposits and from such as the Rand in South Africa, which was horizontally formed beneath the sea, will add a vast sum to the annual gold production. Prof. Shaler is of the opinion that gold will become so cheap that mining operations will no longer pay.

BEAUTIFUL financial system is that of our government, says the Pittsburg, Pa., Democrat. It taxes the people needlessly to get an idle surplus into the treasury, and then to get it out again pays away their money at the rate of 140 in redemption of bonds issued six years ago at 104 1/2. And the paper might have added that \$110,000,000 of this "idle surplus" is deposited in the national banks, on which the banks do not pay a penny of interest, and which is loaned to their customers at 6 per cent. The people are taxed to create a banking capital.

An official of the B. & O. railroad com-

pany recently told a reporter of the Newark, N. J., Advocate that a carload of insane soldiers from the Philippines had been passing through Newark for the insane hospital at Washington, D. C., regularly every two weeks for some time past.

THE Russian government announces that it has practically completed the Moscow, Vladivostok, Manchuria railroad, 5542 miles in length and costing \$390,000,000. The British government has also completed the laying of 15,000 nautical miles of cable, bringing Great Britain in electrical communication with its most distant colonies.

GOVERNMENT officials are exerting themselves to prevent the shipment of munitions of war from San Francisco to South American ports, fearing they are to be used in the Colombo-Venezuelan trouble. American mules, however, continue to go from United States ports to agents of John Bull in South Africa.

THE brightest beam of hope for the democrats that has come from the election is Congressman Grosvenor's declaration that "the returns mean that the protective tariff is no more to be revised or modified than the Ten Commandments."

MOST appropriately, Prof. Smith, of Rockefeller's Chicago Kerosene University, expresses the opinion that "trusts are monarchies, unlimited and unconstitutional monarchies." One honest professor at least.

JOHN MORLEY, pointing to the fact that the British taxpayer's load has been increased by \$160,000,000 a year during the last ten years, declares there is "real danger ahead of the country."

THE British now demand "unconditional surrender" from the Boers. As death seems as desirable as submission on such terms, they will struggle on to the bitter end.

MRS. ORRIN W. POTTER, of Chicago, given up as incurable from cancer, has been pronounced cured by three exposures a week for two months to the X-ray.

Brain-Feed Nonsense.
Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for bopes. A correct diet will not only nourish a particular part of the body, but it will sustain every other part. Yet however good your food may be, its nutrition is destroyed by indigestion or dyspepsia. You must prepare for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of the healthy millions. A few doses side digestion, stimulates the liver to healthy action, purifies the blood, and makes you feel buoyant and vigorous. You can get Dr. G. G. Green's reliable remedies at George A. Harding's drugstore.

For Over Fifty Years.
AN OLD and WELL-TRIED REMEDY.—Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays all pain, cures wind colic, and is the best remedy for Diarrhoea. It is pleasant to the taste, Sold by Druggists in every part of the World. Twenty-five cents a bottle. Its value is unmeasurable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.

Bright's Disease.
The largest sum ever paid for a prescription, changed hands in San Francisco, Aug. 30, 1901. The transfer involved in coin and stock \$12,500.00 and was paid by a party of business men for a specific for Bright's Disease and Diabetes, hitherto incurable diseases.

They commenced the series investigation of the specific Nov. 15, 1900. They interviewed scores of the cured and tried it out on its merits by putting over three dozen cases on the treatment and watching them. They also got physicians to name chronic, incurable cases, and administered it with the physicians for judges. Up to Aug. 25, eighty-seven percent of the test cases were either well or progressing favorably. There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address John J. Fulton Company, 420 Montgomery St., San Francisco, Cal.

It is Easy to Say
"Be careful," but we must all go from heated houses into chill outer air, and the change sets us coughing and wheezing. Avoiding winter colds is difficult; curing them is not hard if you take Allen's Lung Balm. Better begin when the cold is young and not wait until it settles deep into the lungs, for then, even with Allen's Lung Balm, complete relief will be slower.

Piano tickets with all purchases at Moore's Pharmacy.

ASCENDING DISCOVERY.
From Copperville, Mich., comes word of a wonderful discovery of a pleasant tasting liquid that when used before retiring by anyone troubled with a bad cough always insures a good night's rest. "It will soon cure the cough too," writes Mrs. S. Himelberger, "for three generations of our family have used Dr. King's New Discovery for Consumption and never found its equal for Coughs and Colds." It is an unrivaled life-saver when used for desperate lung diseases. Guaranteed bottles 50c and \$1.00 at G. A. Harding. Trial bottles free.

How Strong Ape You?

The dial of the punching machine won't answer that question. Strength depends on nutrition. When the stomach and other organs of digestion and nutrition are diseased, the body fails to receive its full supply of nourishment and hence grows weak. That is why no man is stronger than his stomach. Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and the allied organs of digestion and nutrition. The food eaten is then perfectly digested and assimilated and the body is made strong in the only possible way—by nutrition.

"I was troubled with indigestion for about two years," writes Wm. Bowker, Esq., of Julietta, Latah Co., Idaho. "I tried different doctors and remedies but to no avail, until I wrote to you and you told me what to do. I suffered with a pain in my stomach and left side and thought that it would kill me. Now I am glad to write this and let you know that I am all right. I can do my work now without pain and I don't have that tired feeling that I used to have. Five bottles of Dr. Pierce's Golden Medical Discovery and two vials of his 'Pleasant Pellets' cured me."

Dr. Pierce's Pleasant Pellets stimulate the liver.

A WORTHY SUCCESSOR.

"Something New Under the Sun."
All Doctors have tried to cure CATARRH by the use of powders, acid gases, inhalers and drugs in paste form. The powders dry up the mucous membranes causing them to crack open and bleed. The powerful acids used in the inhalers have entirely eaten away the same membranes that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of the treatment of CATARRH, has at last perfected a Treatment which when faithfully used, not only relieves at once, but permanently cures CATARRH, by removing the cause, stopping the discharges, and curing all inflammation. It is the only remedy known to science that actually reaches the afflicted parts. This wonderful remedy is known as "SNUFFLES the GUARANTEED CATARRH CURE" and is sold at the extremely low price of One Dollar, each package containing internal and external medicine sufficient for a full month's treatment and everything necessary to its perfect use.

"SNUFFLES" is the only perfect CATARRH CURE ever made and is now recognized as the only safe and positive cure for that annoying and disgusting disease. It cures all inflammation quickly and permanently and is also wonderfully quick to relieve HAY FEVER or COLD in the HEAD.

CATARRH when neglected often leads to CONSUMPTION—"SNUFFLES" will save you if you use it at once. It is no ordinary remedy, but a complete treatment which is positively guaranteed to Cure CATARRH in any form or stage if used according to the directions which accompany each package. Don't delay but send for it at once and write full particulars as to your condition, and you will receive special advice from the discoverer of this wonderful remedy regarding your case without cost to you beyond the regular price of One Dollar. Address Dept. E 591, EPHWIN B. GILES & COMPANY, 2330 and 2332 Market Street, Philadelphia.

School Books at Charman & Co.

When you want a good square meal go to the Brunswick restaurant, opposite suspension bridge, L. Brunswick, proprietor. Everything fresh and clean and well cooked; just like you get at home. This is the only first-class restaurant in Oregon City and where you can get a good meal for the price of a poor one elsewhere.

Our prices showed. Your money saved in millinery at Red Front Store.

The Portland City & Oregon Railway Company will run cars every 30 minutes between Oregon City and Portland Sunday. A delightful ride for only 25 cents the round trip. The cars run clean and bright to Canemah on that day.

FIGPRUNE Cereal

A perfect cereal coffee of delicate flavor and fragrant aroma. The blending of California figs and prunes with well ripened grain makes a fruit and grain coffee far superior to any other cereal beverage. By our process all the delightful flavor of the fruit and healthful strength of the grain is retained. Tastes like coffee—looks like coffee. Healthful—nutritious. Boil from 5 to 10 minutes only. ALL GROCERS SELL FIGPRUNE CEREAL.
