ARE YOU DEAF? ANY HEAD NOISES?

ALL CASES OF DEAFNESS OR HARD HEARING ARE NOW CURABLE

by our new invention. Only those born deaf are incurable.

HEAD NOISES CEASE IMMEDIATELY.

F. A. WERMAN, OF BALTIMORE, SAYS:

Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion. About five years ago my right ear began to ring, and this kept on getting worse, until I lost my hearing in this ear entirely. I underwent a treatment for catarrh, for three months, without any success, consulted a number of physicians, among others, the most eminent ear specialists of this city, who told me that only an operation could help me, and even that only temporarily, that the deafness would then cease, but the hearing in the affected ear would be lost forever. I then saw your advertisement, accidentally in a New York paper, and ordered your treatment. After I had used it only a few days according to your directions, the noises ceased, and to-day, after five weeks, my hearing in the affected ear has been entirely restored. I thank you heartily and beg to remain Very truly yours,

F. A. WERMAN, 726 S. Broadway, Baltimore, Md.

Why Water Won't Fry.

Why cannot we fry in water? Because water can only be heated to the boiling point, 212 degrees, and any additional heat does not increase its temperature. Two hundred and twelve degrees of heat will not brown the surface of anything. Fat, on the contrary, can be made much hotter, the temperature depending on the kind. There is a lesson here for the economical housewife. Don't stuff the stove with fuel when the vegetables, meat, etc., are already boiling. They cook no faster because of the increase of heat.

A Share in a Jewel.

There is a story told of a French servant who was shown a priceless jewel by a great duke.

"Thank you, my lord duke," said the man of science, "for allowing me to share with you the possession of so great a treasure."

"In what way?" said the duke.

"Why, your grace can do no more than look at it, and you have allowed me to do the same."—All the Year Round.

Living Like a Savage.

Civilized people will be shocked at the advice of an English physician to a wealthy patient to live like a savage to be cured. Savages, it may be recalled, do not belong to clubs, have no stock exchanges, know nothing of trust and trade combinations, run no political campaigns and so reserve some vitality and nerve force for purely living purposes.—Baltimore American.

No Deferred Payments.

"Is your daughter learning to play by note?"

"Certainly not," answered Mrs. Cumrox a little indignantly. "We pay cash for every lesson. The idea!"—Washington Star.

Well Bred.

Gentleman—That looks a well bred dog.

Owner—I should think he was well bred. Why, he won't have a bit of dinner till he gets his collar on!—Punch.

HANDY FARM DERRICK.

A Cheap Contrivance For Handling Barrels and Sacks of Produce.

A simple and cheaply constructed boom derrick arranged as illustrated will be found of much service by a great many farmers, and the time and labor that will be saved by its use will more than equal that required to make it, says an Ohio Farmer writer. When boxes, barrels or sacks of produce are stored in a basement, one man without some mechanical assistance of this kind will be unable to lift them from the cellar way and load on a wagon conveniently, and even if several men engage in the work they cannot remove and load the articles as easily and speedily without the derrick as they can by its help. A derrick made in the

A SIMPLE DERRICK.

same way and supported as best suits the case on hand will often be useful for other purposes, such as getting out stone, loading ice, etc.

For the derrick post use a piece of stout timber not less than 4 by 4 inches square, or a round pole if preferable. The length of this pole will be governed somewhat by the length of the boom and by the situation of the derrick. For the boom use a round or square piece of light but strong wood 10 to 15 feet long. Insert a heavy iron pin in the top and the foot of the post and put on iron bands. Hinge one end of the boom with iron straps and bolt it to the post about five feet from the bottom, and on the other end put a band with eyes or hoops, as is shown in the partial illustration of the derrick.

If the post is round instead of square, as pictured, the boom may be attached by using a band on the post and the iron device on the boom, like those shown in one corner of the same illustration, both of which may be made from a heavy wagon tire and fastened in place by bolts in the holes made for this purpose.

The top of the post and the end of the boom are connected by a rope and a pair of single pulleys or, better, by a double block tackle.

The lower pin of the derrick post revolves in a wooden block having an iron socket or a heavy stone with a hole drilled to receive it, and the top pin is held by a strong projecting wood or iron cleat or one of the building timbers.

The part of the post above the point at which the boom is hinged should be as long as the boom, so as not to have the tackle work with too great loss of power.

When the boom is elevated to a horizontal position, the article being lifted will be about the right height for loading on a wagon, and the end of the boom may by means of the revolving post be swung round to the point desired.

With a double block tackle one man by ordinary exertion ought to be able to handle conveniently a weight of 300 or 400 pounds.

By attaching a hay rope pulley to a firm stake near the foot of the derrick or to the building the rope may be conducted over it and have a single

tree attached for a horse when it is necessary to lift a more than ordinary heavy object from the cellarway.

The Ohio Stomach Worm Remedy.

One tablespoonful of gasoline and four ounces of sweet milk shaken together is a good dose for sheep weighing anywhere from 60 to 100 pounds. The quantity of milk may be reduced or increased slightly without detrimental results.

Each sheep or lamb should be set on his hump and so held that he will not struggle while the dose is given as a drench, and his head should not be thrown back farther than the natural position while standing.

This stomach worm treatment should be given only after 12 to 18 hours fasting, and neither water nor feed should be given inside of two hours after giving the medicine.

Treatment should be given three days consecutively, then repeated one week or ten days later for the same number of days.
