Painless Dentistry DENTAL BRIDGE WORK OF TO-DAY.

By new methods we are able to produce this most beautiful and durable of all dental work without the least pain.

Figure 1 shows a mouth where the four incisors have been extracted, and the two cusps (eye teeth) crowns destroyed to the gum line, showing the cuspid roots prepared to receive a bridge.

Figure 5 shows the loss of two upper teeth, the six year molar and the first bicuspids. The bridge above is attached by an open face gold crown over the second bicuspids, and a bar which extends into a cavity of the adjoining molar.

Figure 9 shows a root with crown ready to attach. It is folly to extract a root when it can be crowned and made as useful as ever.

Figure 2 represents the bridge ready for adjustment.

Figure 6 shows the bridge anchored in position.

Figure 10 is a mouth that has lost all the teeth but four the two cusps and two molars; they are shown as prepared for a full upper bridge.

Figure 3 represents the case after the bridge has been placed in position.

Figure 7 represents a full set of teeth on a gold plate.

Figure 11 shows the bridge complete, ready to place in position, as shown in figure 10.

Figure 4—It is useless to wear a plate in the mouth when a bridge can be attached to a few remaining teeth and roots.

Figure 8 illustrates a case in which the lateral incisor has been lost and the central incisor crown destroyed. To this root a crown has been fastened and a tooth has been adhered to the crown to fit the lateral space left by the lost lateral incisor.

Figure 12 shows the bridge in place, natural as life.

DR. PICKENS, whose life has been devoted to the study of the Dental Art, makes a specialty, not of robbing the mouth of the teeth still left for service, but of building up a full set (painless) from the teeth and roots which afford sufficient basis for crown and bridge work. He is prepared to do all kinds of work pertaining to the dental profession and guarantees the same for five years, at the very lowest prices consistent with first-class work.

Teeth extracted absolutely without pain by a new and harmless method, applied to the gums. No gases or poisonous cocaine. This is the method now being used by the leading dentists of Chicago and New York. Send for illustrated book on "Dental Bridge Work of To-Day." It will be mailed to you free of charge, and will explain so thoroughly the system that you will understand it as well as the dentist.
