DR. PICKENS, whose life has been devoted to the study of the Dental Art, makes a specialty, not of robbing the mouth of the teeth still left for service, but of building up a full set (painless) from the teeth and roots which afford sufficient basis for crown and bridge work. He is prepared to do all kinds of work pertaining to the dental profession and guarantees the same for five years, at the very lewest prices consistent with first-class work.

Teeth extracted absolutely without pain by a new and harmless method, applied to the gums. No gases or poisonous cocaine. This is the method now being used by the leading dentists of Chicago and New York.

Send for illustrated book on "Dental Bridge Work of To-Day." It will be mailed to you free of charge, and will explain so thoroughly he system that you will ur derstand it as well as the dentist.

How To Gain Flesh

Persons have been known to gain a pound a day by taking an ounce of SCOTT'S EMUL-SION. It is strange, but it often happens.

Somehow the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food, which he could not do before, and that is the way the gain is made,
