Consumption. Is often no more or less than a neglected case of catarrh, which in time creates a hacking cough and nature in her endeavors to get rid of the tubercles, sets up an inflammation, matter is secreted and the tubercles is softened. It then comes to a head or separates and the matter is discharged into the nearest air tubes. This the sufferer raises and allays the cough to some extent, but as the air cells fill up with tubercular matter the blood cannot circulate perfectly through the lungs, hence it becomes more impure for want of air, which lessens nature's power to throw off the disease until at last the disease becomes more general, the cough gets greater, followed by night sweats and bleeding of the lungs, finally the sufferer gets weaker and weaker, until death ends this dreadful disease.
