OREGON CITY, JULY 18, 1902.

The sweatshop districts of the great cities are the breeding places of consumption which kills one-tenth or more of the human race.

Congress has not dared to tackle the Philippine transport frauds, nor the deplorable law-breaking of the beef trust and the great railroad companies, its partners in crime and brigandage.

The local paper of a Georgia village states: "The supper for the benefit of the new church lightning rod was a grand success. A dinner will be given tomorrow for the court house steps."

Manila policemen speak English, Chinese, Spanish, Tagalog, Visayan, Pompana, Macabebe, Japanese, Russian and Hindustanee with equal incorrectness, and earn as much as \$800 a year.

Since it is accepted by criminologists as a fact that many criminals are insane it would certainly be worth while to make a post mortem examination of the notorious convict's brain—after he has been caught.

A machine will be placed on the market next year which will work a revolution in harvesting. With six horses and two men it will harvest and sack 25 to 35 acres of wheat per day. The machine threshes the standing grain, not even cutting off the heads.

John W. Gates predicts that "the stocks of the great railroad systems will ultimately prove so valuable that they will no longer be upon the market; they will be held by great estates and by men worth millions. The day is at hand when four or five great communities of interest will divide the roads of the United States."

Governor Taft has concluded negotiations for the purchase from the the Vatican of the friars' land in the Philippines for \$7,000,000. Let's see: Price to Spain, \$20,000,000; cost of benevolent assimilation to date, according to Secretary Root, \$170,000,000; price for friars' lands, \$5,000,000; total for four years' occupation, \$197,000,000 or at the rate of about \$50,000,000 per year.

The St. Louis Globe-Democrat proves that successive democratic state administrations of Missouri have robbed the state of about eleven million dollars. It is, forsooth, a little matter to stumble over. During one session of the Pennsylvania legislature, the Quay republican gang robbed Philadelphia of franchises worth one hundred million dollars.

A Nebraska paper, the Sutton Register, mentions a republican Swede farmer who has recently returned from the land of his birth. While absent his political faith received considerable of a jar. He found McCormick harvesters, of the class that sell for \$125 here at his Nebraska home, selling for \$92, less than half over there. Wire nails, costing \$4 in Nebraska cost \$2.75 over there.

The parcel order business throughout the country runs into many millions of dollars annually. Throughout this state catalogues of mammoth Eastern department stores are distributed, and continually all sorts of merchandise are being ordered, either by mail or express. This deprives local stores of a large amount of trade, which, if a protective tariff is right, ought to be prevented by a prohibitory tariff. If not, why not? But it pays the consumer. Many articles are sold by these mammoth stores at prices sometimes several hundred per cent lower than he can buy them for in Portland.

Dr William Everett in an address at Williams College, Mass., stated the genealogy of the college in this way: first president of Williams was a Yale man, the first president of Yale was from Harvard, the first president of Harvard was from Cambridge. Cambridge is descended from Oxford, Oxford from the University of Paris, and that from the University of Antioch. Antioch descended from Alexandria, and Alexandria from Athens. Between the time of Socrates and now there were sixty-nine generations of men who passed through the nine institutions of learning named. It will be seen that Williams has an illustrious ancestry.

Common testimony proves that the range of the country is being destroyed at the rate of \$5,000,000 acres a year by overstocking, and that the desert gains that much on the meadow annually. This accounts for the frequent shooting scrapes between cattle and sheep men in Eastern Oregon. No longer is there range enough to go round. The statistics in the department of agriculture

show that the potency of the range declined 61 per cent between 1895 and 1901, leaving only 39 per cent of its stock-producing capacity. That decline in the cheapest method of producing beef has sent the price on the hoof up 30 per cent and threatens to cut off our export trade entirely.

Why is it that five years ago binding twine retailed at 5 1/2 cents per pound, while today, with all the great improvement in machinery that has cheapened the cost of production, the farmers are skinned to the tune of 12 1/2 cents per pound? The price of wagons has advanced \$14; the price of barb wire has doubled, and all other machinery advanced in proportion. What does this mean? Does it not show, conclusively, that hundreds of millions of dollars are being filched from the pockets of the farmers to swell the bank account of the manufacturer? Do you think this could be done without a protective tariff, and is not the republican party to blame for the protective tariff?

The address of Henry Watterson, the distinguished editor of the Louisville Courier-Journal, on Abraham Lincoln, delivered at the Chautauqua Auditorium on Saturday, was a masterly presentation of the character and career of the martyred president. It sparkled with the eloquence and bold, striking figures of speech for which the scholarly Kentuckian is famous. That such a glowing tribute should be paid by a journalist who, in his young manhood, was in active sympathy with the states in rebellion, to the one man, himself a Southerner, on whose shoulders rested the burden of the conflict in defense of the nation's life, is evidence both of the loyalty and broadness of vision of the leading minds of the Southland. Mr. Watterson insisted that the gaunt, homely hero, for he was not alone this, but far more, who was the subject of his theme, accomplished his great task under divine inspiration. Let us accept that dictum. If Abraham Lincoln was the divine instrument specially selected to amalgamate this great republic of the western hemisphere, there is assuredly no thought more conducive to patriotism and love of the vast human multitude scattered over the length and breadth of the galaxy of states. Lincoln's fame, like Washington's, will never lose its lustre as long as history endures.

Grant's Pass is visited by a \$50,000 fire.

A NURSE SAYS

Pe-ru-na 's a Tonic of Efficiency.

(READ WHAT WOMEN SAY OF IT.)

MRS. KATE TAYLOR.
Mrs. Kate Taylor, a graduated nurse of prominence, gives her experience with Peruna in an open letter. Her position in society and professional standing combine to give special prominence to her utterances.

CHICAGO, ILL., 427 W. Monroe St.—
"As far as I have observed Peruna is the finest tonic any man or woman can use who is weak from the after-effects of any serious illness.

"I have seen it used in a number of convalescent cases, and have seen several other tonics used, but I found that those who used Peruna had the quickest relief.

"Peruna seems to restore vitality, increase bodily vigor and renew health and strength in a wonderfully short time."—MRS. KATE TAYLOR

In view of the great multitude of women suffering from some form of female disease and yet unable to find any cure, Dr. Hartman, the renowned specialist on female catarrhal diseases, has announced his willingness to direct the treatment of as many cases as make application to him during the summer months without charge. Address The Peruna Medicine Co., Columbus, Ohio.

409-415 Pearl Street, New York.
5c. and \$1.00; all druggists.

Bright's Disease.
The largest sum ever paid for a prescription, changed hands in San Francisco, Aug. 30, 1901. The transfer involved in coin and stock \$112,500.00 and was paid by a party of business men for a specific for Bright's Disease and Diabetes, hitherto incurable diseases. They commenced the series investigation of the specific Nov. 15, 1900. They interviewed scores of the cured and tried it out on its merits by putting over three dozen cases on the treatment and watching them. They also got physicians to name chronic, incurable cases, and administered it with the physicians for judges. Up to Aug. 35, eighty-seven per cent of the test cases were either well or progressing favorably. There being but thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address John J. Fulton Company, 420 Montgomery St., San Francisco, Cal. Charman & Co. are our sole agents in Oregon City.
