Giants and Pygmies of Space. There is an immense range of difference in the brightness of the stars when the sun is taken for a standard of comparison. Some of the stars emit only one one-hundredth as much light as the sun emits. Others emit a thousand times as much light as he does, Indeed, one scientist thinks there are at least two stars each of which is probably 10,000 times as bright as the sun, which signifies that if either of those stars were as near to us as the sun is it would outshine him 10,000 times in brightness. The two stars are Canopus, which is in the southern hemisphere and invisible from our part of the earth, and Rigel, one of the two brightest stars in the constellation Ori-

The Size of Great Britain.

Great Britain is only half as big as Sumatra and double the size of Newfoundland. It stands fifth in point of size in the list of the world's islands. England without Wales is almost identical in point of size with Roumania. It is less than one-quarter as big as France or Germany. The whole British isles only occupy the one sixteenhundredth part of the surface of this globe. Great Britain is widest between Land's End and Kent. The utmost width is 325 miles. It is narrowest between Lock Broom, on the west coast of Scotland, and Bornoch firth, on the east coast. The distance between the heads of these two inlets is but twenty-four miles.

Rubinstein's Reply,

When Rubinstein was traveling through the United States upon a concert tour, it chanced that Barnum's circus followed almost exactly the same route chosen by the great Russian. On one occasion, when the train was filled with snake charmers, acrobats, clowns and the like, the guard, noticing perhaps Rubinstein's remarkable appearance, asked him, "Do you belong to the show?" Turning his leonine head with a say-

age shake Rubinstein answered fiercely, "Sir, I am the show."

"How?"

"If one stand on the other's head,"

"My wife was sick for over eight years," writes Albert H. Fulte, Esq., of Altamont, Grundy Co., Tenn. "She had uterine disease and was treated by two physicans and got no relief. At last I read about Dr. Pierce's medicines and we decided to try his 'Favorite Prescription.' I sent to the drug store and got one bottle and the first dose gave ease and sleep. She had not slept any for three nights. Being sure that it would cure her I sent for five more bottles and when she had taken the sixth bottle she was sound and well." A YOUNG LADY'S LIFE SAVED

Dr. Chas. H. Utter, a prominent physician of Panama, Columbia, in a re-cent letter states: "Last March I had as a patient a young lady sixteen years of age, who had a very bad attack entery. Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her par-ents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhoea Remedy and as a last re-sort prescribed it. The most wonderful result was effected. Within eight hours she was much better; inside of three days she was upon her feet and at the end of one week was entirely cured." For sale by G. A. Harding.
