

CORRESPONDENCE

Molalla.

There has been but little plowing done yet in this locality and no seeding here has not been rain enough so that farmers can plow, which will make fall rain late.

Our school commenced last Monday, the 20th, with a good attendance in both rooms. The prospects at present are very promising for a good school here this winter.

The Ogle Creek mining company have sent an expert to its mines in order to ascertain what they have in that section. He came out last Sunday, but we have not heard what his report was.

Several years ago a Portland company sent Prof. Clayton to expert some mining property they had in the Bald Mountain district on the Clackamas waters. He reported the formation something new to him, and he could tell nothing about it. Messrs. Dimick, Rosenkrans and others are at the Ogle Creek mines on a mining, hunting and general outing expedition.

As the close season approaches more people pass here on their way to the mountains.

Will Shaver, Frank Adams and others went to the mountains yesterday to try their luck in getting some venison, but unless they do better than the majority of hunters about all the meat that they will have while there will be bacon straight.

It is reported from good authority that a party of hunters not a hundred miles from Molalla went to the mountains a short time ago and ran deer for a week or more with a dog, and a hound that they succeeded in killing a small deer. It is strange that some men don't seem to know (and perhaps are less) that we have a statute law forbidding the hunting of deer with dogs.

There is just this much about it. Those that are used to have been making a practice of hunting deer with dogs will some day do so just once too often, and someone will have a fine to pay. There were one time this summer several deer along the Molalla river in this section, and as many as five were seen together before the season opened, but it was not long until a pack of hounds were turned loose, and one deer was wounded, and several days after was found dead. Now it is hard to find a track of a deer along the river unless made by a deer that has been there.

China pheasants seem to be very scarce here this season in this section, and I have heard it is the same in other localities, and is caused perhaps by their cold rains last spring during their setting season or too many brace-loaders shot guns. There is no danger of any exceeding the limit in hunting round here.

D. C. Boyles went to Portland last Sunday.

Dr. Everman Robbins has gone to Portland for the winter. Dr. Herby has charge of his practice and keeps all his "yasso" on hand and is ready and willing to attend calls day or night.

There will surely be another wedding at Molalla soon.

Say, Jim, the next time you come over here on a business trip, don't forget to turn down the lamps some time between midnight and morning when the neighbors won't know when you go home.
