WEEDS

Consumption is a human weed flourishing best in weak lungs. Like other weeds it's easily destroyed while young; when old, sometimes impossible.

Strengthen the lungs as you would weak land and the weeds will disappear.

The best lung fertilizer is Scott's Emulsion. Salt pork is good too, but it is very hard to digest.

The time to treat consumption is when you begin trying to hide it from yourself. Others see it, you won't.

Don't wait until you can't deceive yourself any longer. Begin with the first thought to take Scott's Emulsion. If it isn't really consumption so much the better; you will soon forget it and be better for the treatment. If it is consumption you can't expect to be cured at once, but if you will begin in time and will be rigidly regular in your treatment you will win.

Scott's Emulsion, fresh air, rest all you can, eat all you can, that's the treatment and that's the best treatment.

We will send you a little of the Emulsion free. Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy. **SCOTT & BOWNE, Chemists, 409 Pearl St., N. Y.** See and get all druggists.

Am glad to recommend it to all in need and seeking relief from colds and coughs and bronchial affections. It is non-narcotic and safe in the hands of the most unprofessional. A New Danger.

Tatty Tiptons, when robbed of a jewel, felt the loss to be utterly cruel. For she cried in a fright, "Though it's not anthracite, I'm afraid they will use it for fuel." —Cincinnati Enquirer.

A Good Shot.

A peculiar incident happened at the Yarran (Victoria) rifle ranges. A man was taking aim at 400 yards, and just as he fired several magpies flew in front of him about 200 yards distant. The bullet struck one of the magpies and brought it to the ground, and a bulls-eye was registered by the marker for the shot. A bulls-eye and "magpie" were thus scored for one shot.
