It may perhaps be unwise to comment on an entertainment in which the writer personally participates, but when the actors and audience are in such harmony as they were on this occasion, it is only justice when we say that all who were present, are deserving of the highest credit for their excellent performance, and the audience (numbering about 200) for their excellent order and good will. WEEDS

Consumption is a human weed flourishing best in weak lungs. Like other weeds it's easily destroyed while young; when old, sometimes impossible.

Strengthen the lungs as you would weak land and the weeds will disappear.

The best lung fertilizer is Scott's Emulsion. Salt pork is good too, but it's very hard to digest.

The time to treat consumption is when you begin trying to hide it from yourself. Others see it, you won't.

Don't wait until you can't deceive yourself any longer. Begin with the first thought to take Scott's Emulsion. If it isn't really consumption so much the better; you will soon forget it and be better for the treatment. If it is consumption you can't expect to be cured at once, but if you will begin in time and will be rigidly regular in your treatment you will win.

Scott's Emulsion, fresh air, rest all you can, eat all you can, that's the treatment and that's the best treatment.

We will send you a little of the Emulsion free. Be sure that this picture in the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE, Chemists, 409 Pearl St., N. Y. 50c. and \$1; all druggists.

Arbureta.

Most people will wonder where Arbureta is, and we hope some will take interest enough to find out, but we implore those seeking information not to look on the map for such a search would be useless. We would like to inform you, but do not know how for we cannot say we are twelve miles from land nor twelve miles from water. That would be impossible in Oregon, so we will simply say, "Arbureta is in the woods" and let you find out the rest for yourself.

Not long ago, a man was seen emerging from the woods, and as he crossed the field, many conjectures were made, as to who he was, and what he wanted. His actions indicated that of one being pursued, for why should he come through the woods? And why did he persist in looking back? We were alarmed. Could it be another Tracy? His pace slackened when he had crossed the field. We noticed he was neatly dressed, and after he had talked with us awhile, just imagine our surprise and discomfiture to learn that he was the man who was looking up a route for the new electric road.
