## HOWLING BLIZZARD SWEEP OVER EASTERN STATES FROM LAKES TO GULF.

From Atlantic Coast to Nevada Bitter Cold With Heavy Snow Prevails.

A blizzard of unprecedented severity is sweeping over the country east of the Cascade mountains, the same story of snow and cold coming from all directions. Dispatches show the limit of the storm to be Nevada in the west, the Atlantic ocean in the east, the great lakes in the north and Texas and Georgia in the south. The only country free from the blizzardly conditions is west of the Cascade mountains.

Chicago, Feb. 18.—The whole country from the Atlantic coast to the western slope of the Rocky mountains is suffering from the coldest weather known in February for years. The snow storm which swept over Rocky mountain states has travelled east and south till it covers the whole region as far north as New York on the east and the gulf states on the south.

Beginning in Wyoming and Utah, where extreme cold and deep snow have caused great loss of live stock on the range, the storm extended gradually until Kansas is under a foot of snow and has a temperature below zero. Oklahoma has snow to take the place of rain, and Texas has snow a foot deep. In the far northwest, near the boundary of North Dakota and Canada, Williston is the coldest place in the United States, with the temperature 42 degrees below zero, and the thermometer registers from twenty to thirty below all through the middle west.

The snow reached New York last night when four inches had fallen, following close upon a sleet storm which had almost stopped traffic. The weather bureau predicts snow and gales and extreme cold for the whole Atlantic coast. The same conditions prevail all along the lakes.

The south is just escaping from floods due to heavy rains, which extend from Louisville southeast to Georgia, only to fall into the grip of the bitterest storm of the winter. Trains and telegraph lines are demoralized all through the middle west and in many cities street cars are running under great difficulties.

In Louisville the snowfall was four inches and a strong wind piled the snow into great drifts. The street railway company kept cars moving with great difficulty. Several trolleys were abandoned as snow plows proved powerless to keep the tracks clear.

done as snow plows proved powerless to keep the tracks clear.

In Memphis the snow and sleet storm was one of the worst in years, and interfered to some extent with the operations of the trolley cars and telegraph and telephone wires.

At Fort Worth and Dallas, Texas, the snowfall was heaviest in years, and a general blizzard prevailed throughout the southwest. Reports from Chattanooga, Nashville and Knoxville, Tenn., states that the worst of weather prevails sleet, snow and wind crippling the trolley wires and electric light plants. In Atlanta heavy rain fell accompanied by high winds with almost freezing temperature. The same conditions are reported from all over Georgia. There has been a great drop in the temperature all over the south and extremely cold weather prevails for that section.

In Wyoming, on the ranges, sheep and stock of other kinds are reported to be dying by hundreds. The weather in Wyoming has been 32 degrees below zero. In the southern part of that state this has been one of the hardest winters on stock in the history of the industry, and unless an unexpected spell of warm weather comes the property loss from this source will be very great.

At Reno, Nevada, the mercury has registered below zero for a week or more. The reservoir and supply ditch are frozen, the ditch for a distance of 14 miles being covered. Water to supply Reno is being sluiced down the mountains.

In the Ohio valley the snow is heavy, ranging from four to ten inches in depth and zero weather conditions prevail. Train service is badly crippled on roads running out of Cincinnati and street car traffic is interfered with.

Omaha, Neb., reports twenty degrees below zero and the cold wave has the entire state in its grasp.

The only part of the country that is not suffering from severe climatic conditions is the far northwest, west of the Cascade mountains, where the sun shines brightly and the mercury has not fallen below 20 during the whole winter.

## SUNDAY MORNING BLAZE.

Sunday morning at half past ten o'clock just as the preachers had begun their sermons the fire bells clanged out their warning and the fire ladders started with hose and reel down main street towards the Catholic church from over which dense columns of smoke were playing. Arriving upon the scene it was discovered that the roof of Chinaman Tom's cabin which stands on the river bank just north of the church was ablaze. The boys did not take their fire apparatus to the fire but with a few buckets of water extinguished the blaze. At least 1,000 people congregated at the scene of the fire. Just as it was over Chinaman Tom came tearing down the street with all sails set, like a torpedo boat destroyer in a battle, talking piggin English in a string. The loss was trivial.
