Watch Repairing

Watches need attention like all machinery, and the better the watch the more particular its owner should be to have it looked after, watches should be oiled every two years. Oiling involves cleaning, for fine dust finds its way inside the watch and eventually works an injury.

We have the best men we know of for repairing watches—employ none but skilled workmen; and of course we guarantee the work, which means that we can afford to do only work that is first-class.

Our prices are reasonable. If your watch needs repairing we will look it over and tell you how much it will come to before the work is done. We will set and regulate your watch free of charge.
