The S. F. Call ends an editorial on "Pedagogy" thus: One is inclined to go back and rest contentedly with the old idea of free, common school education—the same being that is should give the pupils all a sound and working knowledge of reading, writing and arithmetic, leaving the training of imagination and the affect of that which requires judgment and discrimination to the maturer period when the mind is capable of analysis. Practically all of them will spend more or less time in Oregon City. Then would it not be a good plan to clean up a bit and get ready for our company? Let the city dwellers see that the streets are put in good condition and let each business man see that his place of business wears its best dress. If this is done we will create a better impression upon the visitors from the outside than we would if we were to allow things to drift along just as they have been drifting.
