Charles T. Penbroke, of Canby, was in Oregon City on Wednesday, and advertised for sale all of his personal property. Mr. Penbroke will shortly remove to The Dalles in Eastern Oregon with his family. He has been quite seriously afflicted with asthma during the past few years and moves to Eastern Oregon in order to get rid of this trouble. Sunday morning the Willamette Pulp and Paper Company closed down a large portion of the mill, and as a consequence three hundred employees of the mill are idle. The shutting down of the mill was caused by the low stage of water in the Willamette, it being impossible to get the logs for the manufacture of paper, down the stream at its present stage. It is not likely that the mill will be closed down more than a week or ten days as rains have been general over the valley this week and a rise may be momentarily expected. Last year the mills were closed for two weeks during October on account of the low water. It is not usual, however, for the mills to have to close and they sometimes run for years without an enforced shutdown.

Company A, O. N. G., met in the office of Captain James U. Campbell Monday evening to determine what should be done with the money and property belonging to the defunct company still on hand. The treasurer reported cash to amount of \$115 on hand besides a considerable amount of personal property. It was the opinion of the company that an independent military company should be organized and resolutions to that effect were adopted. It is the opinion of Captain Campbell that an independent organization is not feasible from the fact that it would not be under the command of any state military organization, and this seems to be about right. Of course the company could organize an independent company, but it would have no military status in the circles of the state military whatever, and would be of no value save as a social organization.

WM. BEARD.

A Mountain Romance

Will be the piece presented by the Clement-Keefer Company on Friday night, October 2nd. This play in very strong melo drama, and requires special scenery and settings. The play is a reproduction of actual life in the mountain where many a truth stranger than fiction, is recorded in the minds of those lovers of freedom and fresh air and never become known to the outside world, from the fact that the people that live in the mountains, become a child of nature and are grave and silent as the trees and rocks that surround them.

Their affection is sincere and honest and their anger a terrible, as that of a wild beast when given a just cause. Every lover of nature will enjoy their play from the life likeness of the scenery and character. Mr. Clement, who is the manager of the company, for several Oregon speculators is well known in this city, and no doubt his friends will be glad to see his genial face at the head of a well selected company.

In gout the skin secretions take a special odor, which Sydenham compares to that of whey. "Johnny," said the teacher, "write a sentence containing the word 'contents'."

After a few moments' hard labor Johnny submitted the following: "The contents of a cow is milk."—Chicago News.
