Tooth Salvation

It is my aim in the care of teeth. Do you realize that many teeth you think have gone too far can be saved either by a filling that is properly inserted or by crowning. All I ask is that the root be firm in its attachments and upon this I can place a crown either porcelain or gold that will give absolute satisfaction. If you have a front tooth badly broken down have it crowned with a porcelain crown that looks so much like nature's own handwork that it defies detection. My work is modern, my equipment is modern and my prices are moderate. Open evenings from 7 to 8, Sundays from 9 a. m. to 12 m.

Prescriptions Properly prepared

This represents the foundation of our business—the corner stone of our success.

That word "properly" means something here. It means—that we are careful to have none but the purest and freshest drugs—careful that every prescription gets just exactly what it calls for.

It isn't an easy thing to properly compound a prescription. It requires care and brains; it requires accuracy and practice.

No boy's work behind our prescription counter. We make a specialty of putting up prescriptions. We can do it better than the man who doesn't. We have had experience, long and varied. We want your prescription trade.

Your Doctor

Will be Satisfied

Don't hesitate to tell your doctor that you are going to have his prescription filled at Huntley's. If he's honest with you he will undoubtedly say that Huntley will fill it as carefully and as conscientiously as any druggist in the state. If he SHOULD hem and haw and say "well, I've written for a new preparation and they MAY not have it" or "Huntley is all right but this is a private formula and he won't know what it is" etc.; then don't you believe him. His reasons for trying to SEND you somewhere else would be worth finding out. We have the new drugs and chemicals as fast as they come out and we also have the private formulas; anyhow you can trust us to be frank with you. If we don't have the necessary ingredients, we'll say so; but we do not have to turn away one prescription in 500 for lack of the proper ingredients. We have it---that's our business. Why not save 20 to 25 per cent. on your prescriptions by always coming to us?
