HEALTHY WOMEN

Praise Pe-ru-na as a Cure for Colds and a Preventive of Catarrh.

MRS. M. J. BRINK FIRST STAGE OF CATARRH. A Serious Mistake Which Thousands Are Making.

The first stage of catarrh is what is commonly known as "catching cold." It may be in the head, nose, throat or lungs. Its beginning is sometimes so severe as to cause a chill and considerable fever, or it may be so slight as to not hinder a person from his usual business. In perhaps a majority of cases little or no attention is paid to the first stage of catarrh, and hence it is that nearly one-half of the people have chronic catarrh in some form.

To neglect a cold is to invite chronic catarrh. As soon as any one discovers the first symptoms of catching cold he should at once begin the use of Peruna

according to directions on the bottle, and the cold is sure to pass away without leaving any bad effects.

Unless this is done the cold is almost sure to end in the second stage of catarrh, which is making so many lives miserable. If Peruna was taken every time one has a cold or cough, chronic catarrh would be practically an unknown disease.

Miss Elizabeth Ueber, No. 67 Bassett street, Albany, N. Y., writes: "I have always dreaded unsettled weather because of my extreme liability to catch cold, when a catarrhal trouble would quickly develop through my entire system, which it would take weeks to drive away. I am thankful to say that since I have taken PERUNA I do not have any reason to dread this anymore. If I have been at all exposed to the damp, wet or cold weather, I take a dose or two of PERUNA, and it throws out any hint of sickness from my system."—Miss Elizabeth Ueber.

Mrs. M. J. Brink, No. 829 Michigan avenue, St. Joseph, Mich., writes: "This past winter during the wet and cold weather I caught a sudden and severe cold, which developed a catarrhal condition through my entire system, and so affected my general health that I was completely broken down, and became nervous and hysterical and unfit to supervise my home. My physician prescribed for me, but somehow his medicine did me no good. Reading of PERUNA I decided to try it. After I had taken but three bottles I found myself in the health."—Mrs. M. J. Brink.

Sibyl A. Hadley, 21 Main street, Huntington, Ind., writes: "Last winter after getting my feet wet I began to cough, which gradually grew worse until my throat was sore and raw. Ordinary remedies did not

help me and cough remedies nauseated me. Reading an advertisement of what PERUNA could do, I decided to try a bottle, and you can imagine how glad I felt when it began to relieve me in a very short time. In less than two weeks I was completely cured."—Sibyl A. Hadley.

Miss Sara McGahan, No. 137 31 street, Albany, N. Y., writes: "A few months ago I suffered with a severe attack of influenza, which nothing seemed to relieve. My hearing became bad, my eyes became irritated and feverish. Nothing seemed right and nothing I ate tasted good. I took PERUNA and within two weeks I was perfectly well."—Sara McGahan.

If you do not derive prompt and satisfactory results from the use of Peruna write at once to Dr. Hartman, giving a full statement of your case, and he will be glad to give you his valuable advice gratis.
