There is a Difference in drugs MORE perhaps than you are aware of. For instance: Common table salt costs 10c for a three pound bag at the grocery, but the same salt purified costs 27 cents a pound. Commercial Sulphuric acid costs 2 cents, while chemically pure costs 35 cents a pound; commercial Muriate of Ammonia costs 11 cents, but the chemically pure costs 55 cents. So it is all through the list of drugs. For many purposes the common kind is alright. A person would be foolish to pay 55 cents a pound for Muriate of Ammonia to fix his electric battery, but when it comes to using it medicinally the best is none too good.
