An Editor's Opinion of the Royal Gorge.

Edyth Tozier Weathered, in describing a recent trip over the Denver & Rio Grande Railroad, says in "The Exposition":

"At last the goal of the ambition of years has been reached—marvelous, wonderful, grand and inspiring Royal Gorge is on either hand. The only disappointing thing is you only have one pair of eyes, while the train darts in and out of the tremendous chasm. If any who have never seen it are wondering how it looks just go and see it. Thousands have tried to describe it, yet every attempt falls short of giving the subject justice."

If you contemplate a trip East, write W. C. McBride, 124 Third street, Portland, Oregon, for booklets, picturing Colorado's famous scenery and any other information you may desire.

Verdict for Babler.

Justice Stipp has rendered a decision in favor of Henry Babler, who was sued several weeks ago by Joseph Rogers for the recovery of a bicycle, which Roger alleged had been taken from him forcibly by Babler. The latter in his defense, set up that Roger had given the wheel as security for a debt of \$9.50 that he owed Babler for meat.

Mixed Paint

These two words cause a multitude of sins in the paint business. But mixed paints, that is, paint ground by machinery and the proper ingredients used in the making is a cheaper and better paint than any that can be mixed by hand. The trouble has been, heretofore, people have imagined that all mixed paint was the same and when they bought some and found it didn't wear, they just naturally condemned all ready made paints. That is natural enough, but people who, years ago were particular, and used Sherwin-Williams Paint are so well pleased with the results that they are using it again and recommending it to their friends. We could (and will if you give us a chance) point out several houses painted with S. W. P. many years ago—some at least a dozen, that even now look as good as many lead and oil houses painted four or five years ago. Sherwin-Williams Paint is made just right, not too much lead nor too much zinc, but just the proper amount of each; years of experience have taught these largest paint makers in the world how to make the best. If you are thinking of painting this year come in and let us give you an estimate.
