Sanders Plows Please

All Who Use Them

Wide range of hitch; no side draft, grease cups on each disc bearing. Loose boxes on the wheels. Levers all in easy reach and all the necessary adjustments. 1, 2, 3, 4 and 5 disc sizes. SANDERS DISC PLOWS please everyone, everywhere.

This spring 50 acres. The disc runs easier than a walling plow, doing the same amount of work with four horses. My ground is heavy clay. My grain looks better where I plowed with disc than where it was plowed with a walling plow. I have no fault to find with the plow and can recommend it to anyone having use for the same.

Spuds, Murphys, Potatoes are one and the same, but not so with the machines that dig them. There's a difference, and the principal difference is that the

HOOVER POTATO DIGGER

is the best. It goes right down under them and digs every potato in every hill, separates the vines and dirt, puts the potatoes in a row, nice and clean and ready to be picked.

Escaped From Asylum.

Constable Trembath left yesterday for Wilsonville to bring in William Morrison, who escaped from the state insane asylum September 16. He was committed from this county July 1, 1902. His insanity was not a dangerous or violent form and he was placed on the asylum farm, taking the first chance to get away. Tuesday morning he was seen at his home at Wilsonville, and told his wife he was hungry. After being fed he left the house, but his whereabouts are known and he will be sent back to the asylum.
