

NEWS OF THE COUNTY

LOGAN.

Perhaps it is not too late for a more detailed report of the farmers' institute than appeared in the last Courier. Professor Kent is not a stranger in Logan, having lectured at an institute about five years ago. He made no attempt to oom dairying but claims for it that it furnishes a good way to dispose of the legume crops which it is necessary to raise to keep up the fertility of the land and said that the manure from the cattle is a part of the proceeds that is often overlooked, but is very important. Another advantage is that it furnishes a monthly income and thus keeps money in circulation. He recommended sticking to some one of the standard dairy breeds. Many amusing accounts of Oregon dairying were given.

W. R. Newell showed himself to be a thorough horticulturist, both by his address and by replies to numerous questions. He said that Willamette Valley soils will produce more strawberries to the acre than they can in Hood River and that apple raising would pay as well here as there if done in as thorough a way and marketed in like manner.

J. U. Campbell was cheered for saying that Oregon City is many years behind the times, but when he included Logan it did not sound so pleasant. Maybe a Horticultural society will help us to catch up with the procession. He said that \$1,000 reward was offered at the Centennial Exposition for an Oregon apple with a worm in it, but now a man would almost be safe to offer \$1,000 reward in Oregon City for a wormless apple.

SANDY.

Sandy people are experiencing real Oregon winter weather and quite a few complain of colds and grip.

Considerable talk is going on about the building of a branch line from the O. W. P. at Cedarville to Troutdale. The Portland daily papers mentioned it also, but Sandy people are wondering why the O. W. P. does not instead build a line from Boring to Sandy. Seems like it would be the proper thing, as Troutdale has a railroad; besides it is near the Columbia river and as north bank railroad will tap the Washogal country, it seems that such building of a branch line would not be a very judicious improvement. Comparing the natural resources of both, Sandy with its millions of feet of fine timber, its fertile soil, its productive farms and great dairy industry, saw milling, fruit and cattle raising, it certainly would, if properly advertised, be an inducement to build a railroad to Sandy instead of Troutdale.

Besides Sandy is situated on the natural route to Mt. Hood and the mighty powerful Sandy river power is now going to waste by its side, while further up towards Mt. Hood, immense timber awaits only means to bring it to market; also a great mining country will in the future be opened up on Cheney Creek, which is now in an undeveloped state simply because the ore, which is smelting ore, can't be hauled to market for lack of transporting means.

The usual routine of business was gone through with, and at 11:30 o'clock a recess was taken for dinner, which was served in the usual grand style, over 50 partaking of the feast, after which one and a half hours was devoted to the contest which was spirited to an unusual degree. Some fine original poems, essays, and off hand speeches were made and a general good time was had. "Take Time by the Forelock"

Is a trite saying and a very old one, but is just as pat today as when it was first uttered. There is no time of business in which it is more important than in the business of farming. The successful farmer of today must plan weeks, months, yes even years ahead, and we want to suggest that right now is none to early to be figuring on what you are going to require in the way of agricultural implements before next spring. We are already preparing to supply our rapidly growing trade, and we want to say to you that we are going to have a fuller, finer, more complete, more up-to-date stock of farm implements and machinery than we have ever shown. It will include a complete assortment of the JOHN DEERE PLOWS and other John Deere Goods, selected with special reference to the demands of this market. We are going to show you such a quality of goods and at such satisfactory prices that when you see them you will not even think of looking elsewhere for what you want.

We want the trade of every farmer in this community. We want YOUR trade, and we are going to get it if good goods, right prices and a "square deal" will bring it.

If you want anything out of the regular line come and talk it over. We have a lot of good things that you may need for fall and winter use. Come in and we'll get them.
