THE OUTLOOK.

Referring to the fight being made large capitalistic enterprises the New York Times remarks, in an extended and vigorous article: "No other government on earth, either now or ever, has been engaged in such a deadly and destructive warfare upon National business credit and security values."

The Times voices the general fear of the ast that a terrible financial him during the Chicago investigation. security values. The large aggregations of wealth really represent the savings of the middle as well as the wealthy class. Through the manage-ment of great financiers these savings go into the development of the natur al resources of the country and this good wages of the labor of the country. Labor, well paid, lives and dresses well and the products of the soil and the factory find ready sale at high prices. This explains the present era of universal prosperity in the United

The relentless assault that is being made by the Government on the representatives of the accumulated wealth of the country will render it impossible for them to make the money at their command pay a substantial interest rate. This, coupled with a feeling of insecurity and uncertainty egarding the outcome of present disturbances, will cause fortunes, great and small, and the savings of smaller property holders to be horded. Then development of natural resources must cease. Labor must become idle The markets for products of the soil and of the factory will be greatly decreased and we will reap the harvest of an insane agitation against the

large financial concerns. It would be possible for the National Administration to avert an impending calamity. Impetousity and demagogism will not do it. Egoism, that places its theories above the sound practical sense and mature judgment of the ablest financiers that history has known will not do it. Determination that is born of stubbornness will not do it.

The wave of prosperity that is already showing signs of receding may awaken the Nation. The people may realize the situation before their socalled leaders and demand a policy of government sane and intelligent. In such case they will not permit politicians thirsting for appliause and glory to think for them; they will name their own officials and will not assent to the program of the present

ember the steamer Lot Whitcomb. built at Milwaukie in 1850. A reminisence of the steamer, and of men of the time, is furnished by the death in Vermont of Captain W. H. H. Hall, who was her first Captain, as the first commissioned pilot on the Columbia and Willamette Rivers. Captain Hall died June 27, in Chelsea, Vt., in his 85th year. He came to Portland in August, 1850, in the bark Louisiana, from San Francisco, to take charge of the Lot Whitcomb. On the same vessel was Jacob Kamm, who came to take the post of engineer of the new steamer. The machinery came up on the Louisiana, on the same trip. Mr. Kamm put it in, and the steamer started to run in the Fall of the same year. She proved too large a boat for the trade at that time, and later was taken to California. On the Louisiana, besides Captain Hall and Engineer Kamm, came John Arvis Waterman and W. D. Carter, who established the Oregon Weekly Times at Milwankle, which later was removed to Portland, where it was published till the Sandy River, south of the Base 1863, when it was suspended. The Doctor Away from Home When Most Needed.

People are often very much disappointed to find that their family physician is away from home when they most need his services. Diseases like cramp colic and cholera morbus require prompt treatment, and have in many instances proven fatal before medicine could be procured of a physician summoned. The right way is to keep a bottle of Chamberlain's Col-Cholera and Diarrhoea Remedy. No physician can prescribe a better medicine for these diseases. A Bold Step.

To overcome the well-grounded and reasonable objections of the more intelligent to the use of secret, medicinal com-pounds, Dr. R. V. Pierce, of Buffalo, N. Y., some time ago, decided to make a bold departure from the usual course pursued by the makers of put-up medicines for do-mestic use, and so has published broad-east and openly to the whole world, a full and compate list of all the ingredients entering into the composition of his widely celebrated updicines. Thus he has taken his numerous patrons and patients into his full confidence. Thus too he has re-moved his medicines from among secret nostring of doubtful merits, and made them frenchies of Known Composition.

By this bold step Dr. Pierce has shown that his formulas are of such excellence that he is not afraid to subject them to the fullest scrutiny.

DEMAND FOR VEGETABLES

Oregon Peaches In Market and Apples and Prunes Will Be Pleantiful Next Week.

The farmers, who have not already put their hay in will finish this week. There is much satisfaction among the farmers over their hay crop, and there was no damage done by the rain, as there was last year, and of other previous years The crop was larger than was anticipated. During the week fresh Oregon grown cucumbers have come into the markets, and the merchants are re-

Long Live the King. is the popular cry throughout European countries; while in America, the cry of the present day is "Long live Dr. King's New Discovery, King of Throat and Lung Remedies!" of

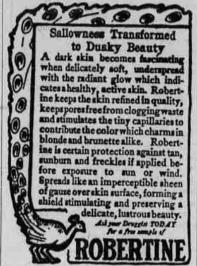

which Mrs. Julia Ryder Paine, Truro, Mass., says: "It never falls to give immediate relief and to quickly cure a cough or cold." Mrs. Paine's opinion is shared by a majority of the in-habitants of this country. New Discovery cures weak lungs and sore throats after all other remedies have failed; and for coughs and colds it's the proven remedy. Guaranteed by Howell & Jones, druggists, 50c and \$1.00.
