

LENTON SEASON

COMMENDS ITSELF TO MILLIONS OF CHRISTIANS.

TIME TO EXAMINE SELF

Local Churches to Observe Forty-Day Season With Appropriate Services.

The Lenten season, which begins this week and will continue forty days, will be observed at St. Paul's Episcopal church by special services.

esty to look into their hearts and lives and examine themselves to see if they are true to their Christian vows, and to seek grace to better live the Christian life. It is a season when honest souls get close to God.

Helped Build the Locks.

D. Harms and John Harms, prosperous farmers of the Mackburg country, were in Oregon City Thursday afternoon, paying their taxes.

FARM NOTES

An Illinois poultry breeder has evolved a rooster with four wings. The odd pair grow out immediately in front of the regular ones and point in the opposite direction.

A farmer of Greene County, Indiana, came into Linton the other day proudly driving a flock of 800 turkeys.

Never leave prunings of trees and bushes lying around. Burn them in the garden fire, and you will know then that all the insects upon them are destroyed.

The soil is the farmer's capital, and he can only keep that capital unimpaired by adding fertility to it.

The air penetrates as deep as we plow. The deeper we plow the more plant food is prepared by the action of the air and more moisture is carried in the soil to withstand droughts.

The man in town thinks of some day moving to a farm, while the farmer's ambition is to live in the city.

A carload of steers with uniform style, size and markings was out of a mixed lot. It is the standard of a carload of even, good-quartered, compact, well-arched, broad-backed, deep-bodied hogs will outsell any mixed mess of the descendants of the cross-bred scrubs.

Soft coal may take the place of charcoal for old hogs, but it tends to clog up the intestines of the small pigs and make them fat.

A Denver paper tells about two neighbors up in the Rocky Mountain country, Colorado, who each sold a carload of steers to the same buyer on the Denver market.

The growing popularity of Oxford Down rams with Scotch flockmasters who use them for the production of early maturing cross-bred lambs, is one of the most notable features of the past few years in sheep breeding.

Figures recently obtained show that the un sold supply of hops in the North Yakima district is 2530 bales of 1907 and 2499 bales of old in the hands of growers.

No Use to Die. "I have found that there is no use to die of lung trouble as long as you can get Dr. King's New Discovery," says Mrs. J. P. White, of Ushboro, Pa.

Men's List—Bernier, Narber; Elliot, Wm. C.; Hanson, Gust; Jackson, E. C.; Miller, John C.; Simon, Leon P. (5).

Good for Everybody. Mr. Norman R. Coulter, a prominent architect, in the Delbert Building, San Francisco, says: "I fully endorse all that has been said of Electric Bitters as a tonic medicine. It is good for everybody. It corrects stomach, liver and kidney disorders in a prompt and efficient manner and builds up the system."

Electric Bitters is the best spring medicine ever sold over a druggist's counter; as a blood purifier it is unequalled. 50c at Howell & Jones' drug store.

Laird Carnegie and brother Rockefeller advise the people to save their money. But the trouble is that it is a mighty hard job to get enough to save.

A Lazy Liver

May be only a tired liver, or a starved liver. It won't be a stupid, as well as a savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs.

A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with over work. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active.

Dr. Pierce's Golden Medical Discovery has made many marvelous cures of "liver trouble" by its wonderful control of the organs of digestion and nutrition. It restores the normal activity of the stomach, increases the secretions of the blood-making glands, cleanses the system from poisonous accumulations, and so relieves the liver of the burdens imposed upon it by the deflection of other organs.

If you have bitter or bad taste in the morning, poor or variable appetite, coated tongue, foul breath, constipation or irregular bowels, feel weak, easily tired, dependent, frequent headaches, "small of back" or "drawing or distressed feeling in stomach, perhaps nausea, or "stings" in throat after eating, and kindred symptoms of weak stomach and torpid liver, no medicine will restore you to normal health so quickly as Dr. Pierce's Golden Medical Discovery.

Perhaps only a part of the above symptoms will be present at one time and yet point to torpid liver or biliousness and weak stomach. Avoid all hot bread and biscuits, griddle cakes and other indigestible food and take the "Golden Medical Discovery" regularly and stick to it as long as you are vicariously strong. The "Discovery" is non-secret, non-alcoholic, is a glyceric extract of native medicinal roots with a full list of its ingredients printed on each bottle-wrapper and attested under oath. Its ingredients are endorsed and attested by the most eminent medical writers of the age and are recommended to cure the diseases for which it is advised. Don't accept a substitute of unknown composition for this non-secret medicine of known composition.

Eugene expects shortly to have in operation a complete concrete block cement brick manufacturing plant. The promotion department of the Commercial Club has interested parties who have a large plant at Niagara Falls, N. Y.

Leon P. Simons, an older employed in the Clark & Wilson lumber mill, at Linton, was almost instantly killed the 21st inst, by being caught in the shafting. At the time the accident occurred Simons was engaged in oiling the machinery. He was in the act of crawling over the main shaft when his clothing in some manner was caught by the rapidly revolving machinery. His body was dashed with great violence against the ceiling timbers, causing almost instant death.

The Benton County sawmill, which has been shut down for the usual winter respite, begins next Monday. The demand for lumber is heavy, and the renewal of operations is earlier than usual.

So many people think of this spraying business a good deal as we used to think of our studies at school. If we could slide through any old way, without working, we were beating the teacher just that much. And, in a measure, this is true with many people about spraying.

They spray because they must—because the fruit inspector might raise a row if they didn't. But, after all, if the right material is used, it is not an expense; on the contrary, every one nearly who has carefully watched the results, find in the end they have saved money by the large increase in fruit as a result of proper spraying. But to get the right material, that's the rub. Probably no concern today makes such a fine calcium sulphide solution as the Rex Co. Their spray is endorsed by the U. S. Government, and our own State entomologist says in a letter to the Rex people that their spray "gave better results than the home-made lime-sulphur or the lime-sulphur and salt spray—Oregon formula—with which it was compared."

We have Rex booklets giving the experience of fruitgrowers all over the Coast, and anyone interested may have one for the asking. For those customers who want Rex spray, we have it in bulk, any quantity, at 40c per gallon. We also have Portland spray at 30c per gallon, and if you MUST make your own, let us sell you the sulphur, lime and blue stone. If not convenient for you to call for a spraying booklet, we will gladly mail you one on receipt of a postcard with your address.
